Hi Kelli,

I would like to thank you and the NIRB for providing MMG Resources Inc. (MMG) with the opportunity to address the comments made by the regulatory agencies. MMG would also like to express our appreciation to all the regulatory agencies for taking the time to review our application and prepare recommendations.

MMG would like to emphasis that the scope of the current application is a modification of the spatial extent of two existing CIRNAC Land Use Permits (issued July 2024) and two existing Nunavut Water Board Water Licences (issued February 2023 and May 2023) for mineral exploration activities to include CIRNAC mineral claims recently acquired in 2024 and 2025 that occur outside the current extents.

As part of re-initializing the Izok Corridor Project, MMG is working on a phased approach to mineral exploration and project advancement. We are actively updating all existing management plans necessary to support ongoing and future mineral exploration and are committed to submit these plans to the NIRB public registry on or before August 5, 2025.

MMG recognizes the importance of community and stakeholder engagement and will be conducting engagement activities commencing in August with regular continued consultation.

By copy of the attached letter, MMG offers responses to the comments and recommendations provided by each regulatory agency.

Please do not hesitate to contact me if you have questions of concerns.

Regards,

Cathy
