CAUTION: This email originated from outside of the organization. Do not click links, open attachments or follow direction, unless you recognize the sender and know the content is safe.

Good afternoon,
Agnico Eagle is providing this correspondence as required under Term and Condition No.5 of Project Certificate No. 003 that states:

Revised Term and Condition No. 5	
Category:	The Assessment of Alternatives to Tail Lake for Tailings Disposal
Responsible Parties:	The Proponent
Project Phase:	Construction, Operation, and Care and Maintenance
Objective:	To minimize the damage to the environment by minimizing the effects decisions being made today have on the alternatives for tomorrow. Also, to facilitate the development of precautionary thresholds to assist with monitoring and detecting potentially significant changes in the region.
Term or Condition:	The Proponent shall report by January 1 of each calendar year to NIRB on its development plan for future phases of the Hope Bay Belt, including identifying development plans that may affect the selection of Tailings Impoundment Area as the preferred alternative for tailings management.
Reporting Requirements:	To be included in the Proponent's annual reporting to the NIRB.
Commentary:	The location of the Tailings Impoundment Area for the Project has been selected and included in the Metal Mining Effluent Regulations.

No plans in 2024 will affect the selection of Tailings Impoundment Area as the preferred alternative for tailings management. Details on 2024 development will be summarized in the annual report per the reporting requirements.

Thank you,
Jen
