Dear Isa / John,

Re: Extension of Land Use Permit #N2006C0027

MMG would like to continue mineral exploration activities on the Izok property. Drilling continues to test targets identified by geophysical surveys around the known resource in attempts to expand it.

In order to do so we request an extension to Land Use Permit # N2006C0027. We would like to have the permit extended by one year, extending it from its current expiry date of July 3 2011 to July 3 2012.

The nature of the activity remains within the scope of that originally permitted under this license. This includes diamond drilling, geological mapping, and geophysical surveying. The area of ground under examination also remains the same.

If you have any questions, please do not hesitate to contact me at your convenience.

Kind regards,

Ted Muraro
Operations Manager
