TITLE: Glacier Mass Balance and Pollution Studies in the Canadian high Arctic

OBJECTIVES OF RESEARCH:

This is an ongoing study aimed at monitoring the mass balance and pollution levels of the Melville, Meighen, Agassiz, Devon ice caps, and the Grise Fiord Glacier. An additional component to this work will be to measure variations in flow rates of 3 glaciers on the Devon ice cap in order to understand how these glaciers will respond to future climate warming.

TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and by the Department of Culture & Heritage archeological sites terms and conditions 09YA006. These terms and conditions will form part of this licence.

DATA COLLECTION IN NU:

DATES: April 01, 2014-December 31, 2014

LOCATION: Devon Island, Ellesmere

Scientific Research License 02 002 14R-M expires on December 31, 2014

Issued at Iqaluit, NU on November 14, 2013
