TITLE: Peregrine Diamonds Ltd. Chidliak Property Baseline Environmental Studies

OBJECTIVES OF RESEARCH:

This is a renewal of baseline environmental studies completed at Chidliak Property from 2009 to 2016. The NIRB Screening File No. is 09YN041. This application is consistent with our previous work completed in the project area from 2009 - 2016, and only includes ground-based surveys to minimize possible disturbance. Chidliak Property is located approximately 120 km northeast of Iqaluit, on the Hall Peninsula of Baffin Island, of Nunavut. The objectives are to identify existing baseline wildlife conditions and to report any important or sensitive wildlife areas to minimize or avoid adverse wildlife effects from any exploration activities. Baseline environmental studies include; water quality sampling, fish and fish habitat survey, and non-intrusive bird, caribou, and other wildlife surveys. The field surveys are expected to be completed over one to two field events from mid-June to late September each year.

TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence.

DATA COLLECTION IN NU:

DATES: June 15, 2018-September 30, 2018

LOCATION: Hall Peninsula

Scientific Research License 01 022 18R-M expires on December 31, 2018

Issued at Iqaluit, NU on June 05, 2018
