AFFILIATION: McGill University

TITLE: Microbial investigations of perennial springs, permafrost and ground ice in the high Arctic

OBJECTIVES OF RESEARCH:

The microbial biodiversity in unique habitats including cold perennial salt springs and permafrost environments have not been fully explored, and molecular traits that enable microorganisms to survive and thrive in the Canadian High Arctic are unknown. My research program examines microbial biodiversity and ecology in unique polar habitats and aims to expand our knowledge of polar microbial communities.

TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions from the Nunavut Impact Review Board Screening Decision Report and by the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence

DATA COLLECTION IN NU:

DATES: June 20, 2015-July 30, 2015

LOCATION: Axel Heiberg

Scientific Research License 02 035 15R-M expires on December 31, 2015

Issued at Iqaluit, NU on June 04, 2015
