Greyhound Property Exploration Project: Annual Report on Wildlife Monitoring

Monitoring and reporting requirements

“The Proponent shall maintain a record of wildlife observations while operating within the project area. The reports should include locations (i.e., latitude and longitude), species, number of animals, a description of the animal activity, and a description of the gender and age of animals if possible. Prior to conducting project activities, the Proponent should map the location of any sensitive wildlife sites such as denning sites, calving areas, caribou crossing sites, and raptor nests in the project area, and identify the timing of critical life history events (i.e., calving, mating, denning and nesting). Additionally, the Proponent should indicate potential impacts from the project, and ensure that operational activities are managed and modified to avoid impacts on wildlife and sensitive sites.”

Paul Pitman, B.Sc. P.Geo.

Project Geologist for Aura Silver

Dear Sir:

In 2013 Aura Silver did not conduct any field activities on claims held in the Baker Lake area.

Respectfully Submitted
