**RE: Acknowledgement of the 2016 Annual Report for Agnico Eagle's
"Greyhound Exploration" Project**

Dear David Frenette:

Please be advised that the Nunavut Impact Review Board (NIRB or Board) received Agnico Eagle's 2016 annual report for the "Greyhound Exploration" project on January 4, 2017 as required pursuant to the Screening Decision Report, dated May 6, 2010.

Term and Condition 1 states:

- 1. The Proponent shall maintain a record of wildlife observations while operating within the project area. The reports should include locations (i.e., latitude and longitude), species, number of animals, a description of the animal activity, and a description of the gender and age of animals if possible. Prior to conducting project activities, the Proponent should map the location of any sensitive wildlife sites such as denning sites, calving areas, caribou crossing sites, and raptor nests in the project area, and identify the timing of critical life history events (i.e., calving, mating, denning and nesting). Additionally, the Proponent should indicate potential impacts from the project, and ensure that operational activities are managed and modified to avoid impacts on wildlife and sensitive sites.*

Upon review of your submission we have concluded that Agnico Eagle's 2016 annual report for the "Greyhound Exploration" project contains the information as required above and that there are no deficiencies to note.

Please forward all submissions via email to info@nirb.ca or through the online public registry at www.nirb.ca.

If you have any questions or require further clarification, please contact the undersigned at (867) 983-4609 or at johokannoak@nirb.ca.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jaida Ohokannoak", followed by a long horizontal flourish.

Jaida Ohokannoak
Manager, Technical Administration
Nunavut Impact Review Board
