

## “Medical” Emergency Procedures

### **Helicopter Evacuation:**

1. Persons at the scene call for “HELP” via any means available.
2. Medic will be dispatched via quickest method available.
  - a. Helicopter if conditions are safe for flight.
  - b. Snow machine; QUAD or 6 wheel ranger; if helicopter travel deemed unsafe OR if helicopter is unavailable (not within reasonable distance).
3. Communicate to all work sites to “STOP WORK” and listen out for further instructions or request for assistance.
4. AEI Supervisor to maintain communications with emergence site; helicopter & work sites.
5. AEI Supervisor to contact Project Manager in Hall Beach so they can arrange necessary transportation for the injured person to:
  - a. Nursing Station in Hall Beach
  - b. Hospital via Medical Evacuation to Iqaluit medical facility.
6. Helicopter & Medic to return to Camp ASAP so work can resume.

All involved personnel to meet with AEI Supervisor “as soon as practical” to complete a report of the incident.

AEI Project Manager to maintain contact with the person and his family to insure accurate information is being passed on.

## **In the event that the Helicopter “CAN NOT” fly**

1. Persons at the scene call for “HELP” via any means available.
2. Medic & a First Aider to be dispatched to the scene using most expedient means available. Snow machine; QUAD; 6X6 Ranger
3. Drilling Foreman & 2<sup>nd</sup> First Aider to be dispatched via tracked vehicle equipped with stretcher and backboard.
4. Communicate to all work sites to “STOP WORK” and listen out for further instructions or requests for assistance.
5. Medic to move injured man as practical within the conditions and limitations of the situation.
6. AEI Supervisor to maintain communications with the emergency site and other work sites.
7. AEI Supervisor to contact Project Manager in Hall Beach and inform them of the situation.
8. Medic to be assisted in gaining communication with a medical facility and gain the assistance of a doctor.
9. When able; take the injured man to the nearest medical facility.

Project Manager to facilitate the injured persons movement to medical aid; as soon as possible; with whatever means available.

All involved personnel to meet with AEI Supervisor “as soon as practical” to complete a report of the incident.
