

THE NUNAVUT IMPACT REVIEW BOARD

SCREENING PART 2 FORMS

TABLE 1 - IDENTIFICATION OF ENVIRONMENTAL IMPACTS

		ENVIRONMENTAL COMPONENTS		PHYSICAL																				BIOLOGICAL										SOCIO-ECONOMIC									
				designated environmental areas																				wildlife, including habitat and migration patterns										archaeological and cultural historic sites									
				ground stability																				vegetation										employment									
				permafrost																				wildlife protected areas										community wellness									
				hydrology / limnology																				aquatic species, incl habitat & migration/spawning										community infrastructure									
				water quality																				wildlife protected areas										human health									
				climate conditions																				other VEC:										other VSEC									
				esker and other unique or fragile landscapes																				other VEC:																			
				surface and bedrock geology																				other VEC:																			
				sediment and soil quality																				other VEC:																			
				tidal processes and bathymetry																																							
				air quality																																							
				noise levels																																							
				other VEC:																																							
				other VEC:																																							
				other VEC:																																							

Notes: Please indicate in the matrix cells whether the interaction causes an impact and whether the impact is:

- P** Positive
N Negative and non-mitigatable
M Negative and mitigatable
U Unknown

If no impact is expected then please leave the cell blank
