AFFILIATION:

TITLE: A East Hudson Bay Network Research Initiative.

OBJECTIVES OF RESEARCH:

Communities in East Hudson Bay are concerned about ecosystem changes observed in recent decades, particularly related to sea ice conditions, and also about potential impacts of contaminants from long range atmospheric transport and region human activities. A community driven research network- The East Hudson Bay Network (EHBN)-has been established to measure and better understand large scale cumulative environmental impacts in East Hudson Bay. Community driven execution of biological collections as well as parallel ecosystems measurements on sea ice and water will allow for more integrated research in the context of environmental change.
