

SECTION 4: NON-TECHNICAL PROJECT PROPOSAL DESCRIPTION

Regional exploration works, Amaruq-Meadowbank-White Hills areas

Agnico Eagle Mines Limited (AEM) acquired in 2014-2015 mineral claims on crown land in the area located between 40km and 140km mostly north of the Baker Lake community. The exploration activities are for gold mineralization with drilling and exploration works. The works are planned to start in 2016. To ensure protection of the Inuit heritage of this area, an archaeological investigation will be conducted on the planned exploration area, as it has been for the last several years.

No new camps are planned to be installed, Agnico Eagle will use the existing facilities (Amaruq or Meadowbank) to support the exploration in these area. For the diamond drilling, Agnico Eagle plans to use up to 2 drills on the claims related to this application. A helicopter will be used to move the drills, equipment and workers. A Dozer D6 could be used during winter on snow cover to move the drills on the part of the drilling area which is located near the existing facilities.
