Re: 2017 Nunavut Archaeologist Permit

Dear Major Prentice:

Enclosed please find a Class 1 Nunavut Territory Archaeologist Permit, No. 2017-01A , authorizing archaeological field research in connection with the project entitled: *Norex (Northern Exercise) 17*.

Please note the checklist on the permit, which indicates the requirements for the disposition of artifacts and documentation resulting from your work.

Please note also: (i) permit holders are required to submit artifact/specimen catalogues in electronic (tab-delimited text) format; (ii) permit reports must be submitted in both hard copy and electronic formats; and (iii) permits holders must obtain prior approval for any destructive analysis of specimens or samples, including for radiometric dating purposes. Destructive analysis requests will not be considered until all permit requirements have been met.

The following information concerning the use of GPS for recording the locations of archaeological sites has been attached to all permits and forms part of the requirements of your permit:

NAD27 - NAD83

Please do not translate coordinate information directly to map(s) unless you are certain that the datums used are the same, i.e., current maps were designated using NAD27 while GPS is based on NAD83. Use other points of reference as well or sites may not be properly located. Whenever a GPS unit is used to acquire locational data, the accuracy of the unit must be taken into account. Accuracy can range from +/- 1 cm to 150 metres; the latter represents a sizeable error.

Wishing you success with your research.

Sincerely,

Director, Heritage

Encl.
