## 1. INTRODUCTION

This Abandonment and Restoration Plan (ARP) applies to mineral exploration activities conducted by Transition Metals Corp. and Nunavut Resources Corporation (the Companies) on the Arcadia Bay Property (the Property), Nunavut, Canada.

This ARP will come into effect 1 June 2017, pending approval. Copies and updates to this plan may be obtained via Transition Metals Corp. (Transition) or APEX Geoscience Ltd. (APEX). The ARP will be replaced, upon approval, if there are any significant changes to the activities outlined in the existing permits which warrant changes to the ARP. Minor changes will be submitted as an addendum to the ARP and submitted to the distribution list as required.

### 1.1 Contact Details

**Transition Metals Corp.**

#5 – 410 Falconbridge Road

Sudbury, ON P3A 4S4

Tel: (705) 669-1777

Fax: (705) 669-1100

[www.transitionmetalscorp.com](http://www.transitionmetalscorp.com)

**Nunavut Resources Corp.**

Box 18

Cambridge Bay, NU X0B 0C0

Tel: (867) 983-2458

Fax: (867) 983-2701

[www.nunavutrc.com](http://www.nunavutrc.com)

**APEX Geoscience Ltd.**

110-8429-24 Street NW

Edmonton, AB T6P 1L3

Tel: (780) 467-3532

Fax: (780) 467-4025

[www.apexgeoscience.com](http://www.apexgeoscience.com)

### 1.2 Purpose and Scope

The purpose of the Arcadia Bay Property ARP is to provide guidelines to follow during seasonal shutdown and final abandonment of the Property, in order to return exploration sites to as near as possible to natural conditions.

### 1.3 Other Plans

The ARP should be considered as a part of the property-wide management system. Other management plans in place at the Arcadia Bay Property include:

- Emergency Response Plan (ERP)
- Environmental Management Plan (EMP)
- Spill Contingency and Fuel Management Plan (SCFMP)
- Waste Management Plan (WMP)

### 1.4 Property and Camp Description

The Arcadia Bay Property is a gold mineral exploration property located within the Kitikmeot region of Nunavut, within the 1:50,000 National Topographic System (NTS) map sheet 076M11. The Property, composed of Inuit-Owned Land (IOL) Parcel CO-31, is located on the shore of Arcadia Bay, on the Coronation Gulf, approximately 160 kilometres (km) east of Kugluktuk, 200 km west of Hope Bay, and 305 km southwest of Cambridge Bay. The Property is centred at approximately 67°42'21.6"N and 111°32'13.2"W or, using the Universal Transverse Mercator (UTM) conformal projection, 483608 E/7510147 N, North American Datum (nad) 83 zone 12. The land parcel measures approximately 7.5 km north-south by 4.5 km east-west covering 2,696 hectares (Appendix 1).

Float or ski-equipped fixed wing aircraft access to the Property is via Salt Lake, located on the northern perimeter of the Property. Alternatively, an airstrip associated with the Ulu deposit is located approximately 95 km to the south or there is also an airstrip at the Tree River Lodge, located approximately 20 km to the west, which can also be utilized. A helicopter will remain

onsite to move personnel and equipment around the project area. A barge landing site, located at the north end of the Property may also be utilized. Barge service is available on the Coronation Gulf for a short season in mid to late summer.

The proposed 2017 exploration activities on the project will include a 12 hole diamond drill program, totaling approximately 2,500 metres (m). A small (12-person) seasonal camp will be required to support the exploration activities at the project. The camp will be located approximately 2 km south of the barge landing, at a historic site used by Orofino Resources Ltd. in the late 1980's. The approximate location of the camp is 67°43'12.9" N and 111°23'6.9" W or 483701E/7511726N UTM NAD 83 Zone 12. The camp structures are expected to include 1 office tent (12X16'), 3 sleeping tents (12X16' each), 1 first aid tent (12X16'), 1 dry (16X20'), 1 generator/storage shack or Weatherhaven tent (14X16'), and 1 core logging/sample storage shack (16X20'). The majority of the structures will be insulated Weatherhaven tents, or similar, with plywood floors.

A fuel cache will be established on stable ground near the camp, primarily to store diesel (to a maximum of 100-205 litre (L) drums) and jet fuel (to a maximum of 50-205 L drums). Small quantities of gasoline (to a maximum of 10-205 L drums) and propane (to a maximum of 50-100 pound (lb) cylinders) will also be stored. Small temporary fuel caches (totaling less than 4,000 L) may also be required to support the exploration activities, such as staking, prospecting, geological sampling and geophysics at the Property.

## **2. SCHEDULE**

The 2017 exploration program is projected to start July 1<sup>st</sup>, or as soon as authorizations are received, and run for approximately 60 days. Prior to subsequent years program commencements, all the regulatory authorities and will be notified and supplied with updated schedules.

As a generalized guide for future timing of activities, equipment and supplies, including camp construction materials, will be mobilized in the spring. It is expected that camp construction will take approximately one week. Drilling will commence as soon as the camp is constructed and all equipment can be mobilized, and may have the potential to continue through the winter.

Exploration programs which may include prospecting, geochemical sampling, ground geophysical surveys and drilling are anticipated for three to four subsequent years, depending on each of the previous year's results.

Final abandonment and restoration will commence as soon as possible after it has been determined that the project does not warrant further exploration or following commercial production. The duration of the final abandonment and restoration is dependent on the scale of infrastructure on site and on environmental parameters (physical, biological, and socio economic). All abandonment and restoration work will be completed prior to the date of expiry of any existing or future applicable land use permits and water licenses.

### **3. DETAILED INFRASTRUCTURE**

#### **3.1 Proposed Seasonal Camp**

The following is a list which details the potential structures, equipment and vehicles that may be constructed or stored at the proposed seasonal camp.

##### **3.1.1 Structures**

- 5 12'x16' insulated Weatherhaven tents (or similar) with plywood flooring to serve as office, sleeping and first aid tents
- 3 16'x20' insulated Weatherhaven tents (or similar) with plywood flooring to serve as kitchen, dry and core logging/sample storage tents. The dry will contain 1 sink and 1 shower.
- 1 14'x16' Weatherhaven tent (or similar) with plywood flooring, or completely wooden shack (to assist with sound insulation), to serve as housing for a 10 to 20 kW diesel generator.
- 1 5'x5' wooden outhouse structure

##### **3.1.2 Other Camp Infrastructure**

- 2 Water tanks (1 for kitchen and 1 for dry)
- 2 Water pumps with fish screens and hose line
- 1 Camp fuel cache, with Insta-Berm (or similar) secondary containment.

##### **3.1.3 Vehicles**

- 1 Helicopter (A-Star, Bell 407, or similar)

##### **3.1.4 Drilling Equipment**

- 1 Zinex A5 (or similar) diamond drill complete with motor, gear box, drill head, tower, overshot, skids, and housing
- 1 Supply pump with shack
- 1 Mix tank with pressure pump
- 6 Coil heater
- 6 Fuel tank
- 6 Fly basket for drill equipment, spares, supplies, etc.
- 400 3 m NQ drill rods
- 50 NQ casing (various sizes)
- 150 100' hose line

## **4. SEASONAL SHUTDOWNS**

### **4.1 Inspection and Documentation**

Prior to a seasonal shutdown of the camp, a complete inspection of all areas will be conducted. Photographs will be taken to document the conditions prior to leaving the site, and will be archived along with any photos taken at the beginning of each season. Copies of these photos will be included as part of the Arcadia Bay Property Annual Report. An example Seasonal Camp Inspection Record is attached in Appendix 2.

### **4.2 Buildings, Content, and Fuel**

A full inventory of all structures, equipment, fuel, and other supplies will be taken at the beginning and end of each exploration season. An example Camp Inventory Record is attached in Appendix 3.

All food, fuel, wastes, empty fuel drums, and valuable or sensitive equipment will be removed from site. A few wooden structures will be left at the camp. All structures to be left on site will be winterized, closed off, and secured. One structure will be designated to house any chemicals or other hazardous materials that are not suited to outdoor storage. All water tanks and pipes will be drained at the end of each season. Pumps and hoses, remaining at site, will be drained and stored inside a secured structure. All mechanical equipment to remain at site, including any drill equipment and generator, will be winterized and stored in berms for secondary containment. When possible, the equipment and berms will be fully covered.

All remaining fuel and empty drums will be removed from site.

### **4.3 Waste**

All 2017 wastes will be separated into combustible, recyclable or hazardous waste and all non-combustible waste will be backhauled for proper disposal.

#### **4.3.1 Combustible Waste**

All combustible waste will be incinerated in accordance with the Nunavut Environmental Guideline for the Burning and Incineration of Solid Waste utilizing an Environment Canada-approved batch waste, controlled air, dual chamber incinerator. Any residual waste (ash) will be placed in sealed containers and backhauled for proper disposal.

#### **4.3.2 Non-Combustible, Recyclable and Hazardous Waste**

All non-combustible, recyclable and hazardous wastes, including lubricating oils, hydraulic fluids, petroleum-based solvents, batteries, aerosol cans and fluorescent light bulbs will be sealed in appropriate containers and backhauled to Yellowknife for proper disposal at an accredited facility.

#### **4.3.3 Grey Water**

Camp grey water will be stored and treated in an excavated sump, which will allow for slow infiltration into the soil and will be located at least 31 m from the high water mark of any water body. If available, coarse gravel will be placed in the bottom of the sump to provide filtration, and supports will be built on the sides to prevent slumping. Filters will be installed on kitchen drains to ensure solid food wastes do not enter the sumps and have the potential to attract wildlife. When full, grey water sumps will be covered with enough material to allow for future ground settlement.

#### **4.3.4 Sewage**

Privy pits (outhouses) will be located at least 31 m from the high water mark of any water body. To control sewage pathogens, outhouses will be periodically treated with lime. When full, the pits will be covered with at least 30 centimetres (cm) of compacted soil. Alternately, portable toilet systems will be used and the waste incinerated.

#### **4.3.5 Contaminated soils/snow**

Any contaminated soil, snow, or ice will be cleaned up immediately in accordance with the Arcadia Bay Property SCFMP. All contaminated soil, snow, and ice will be sealed in 205 Litre steel drums and stored in the hazardous waste storage area to await backhaul to a registered hazardous waste receiver.

#### **4.3.6 Empty fuel drums**

Empty drums will be collected in a designated area and returned to the supplier. Alternatively the drums may be drained, air dried, and backhauled to a recycling facility.

For more information on waste generation and management see the Arcadia Bay Property WMP.

### **4.4 Seasonal Restoration**

Any contaminated areas around the camp, fuel caches or drill sites will be treated in accordance with the Arcadia Bay Property SPFMP. Any washed-out areas will be filled and re-contoured to natural levels. Any areas of disturbed vegetation, including camp, fuel caches or drill sites will be photographed and managed as per recommendation of the KIA and INAC inspector. Remediation procedures might include fertilization to encourage re-growth.

## **5. FINAL ABANDONMENT AND RESTORATION**

### **5.1 Inspection and Documentation**

Prior to final abandonment, a thorough inspection of all areas will be conducted. Any contaminated areas around the camp, fuel caches or drill sites that have gone unnoticed will be treated as per the SPFMP. Photographs will be taken to include in the final reports submitted to the KIA, NWB and NIRB. All relevant regulatory agencies will be notified upon final abandonment of the Property.

### **5.2 Buildings, Content, and Fuel**

Prior to land use permit or lease termination, all structures, equipment, supplies, and fuel will be removed from the Property with the exception of the drill core stacks, which will be permanently secured on site. Any materials of value on site will be salvaged.

Any wooden floors will be burned in accordance with the Nunavut Environmental Guideline for the Burning and Incineration of Solid Waste, and tent sites may be fertilized, as per recommendation by the Inspector, to encourage re-vegetation. The open burning of structures will only occur after approval from the KIA and NWB. A request letter will be submitted to the regulating authorities, which will include the characteristic and volume of material to be burned.

Drills and drilling equipment will be dismantled, packaged, secured, and shipped as per the drill contract. All drill casing will be removed from the ground or cut down to ground level, or below, if removal is not possible.

All remaining fuel and empty drums will be removed from site. The soil under and surrounding any area where fuel was stored will be thoroughly inspected for any contamination and photographs will be taken.

### 5.3 Waste

All wastes will be disposed of in accordance with the Arcadia Bay Property WMP and any contamination will be treated as per the SPFMP. Sumps will be inspected to ensure there is no leaching or run-off. Back filling and levelling will be employed as necessary.

### 5.4 Restoration

Tent sites, drill sites, and any other areas disturbed by activities related to exploration at the Arcadia Bay Property will be fertilized as recommended by the KIA and INAC Inspector to encourage re-vegetation. Eroded or washed out areas related to exploration activities will be filled and re-contoured to natural levels. Any contaminated areas around the camp, fuel caches or drill sites that have gone unnoticed will be treated as per the SPFMP.

## 6. POST-CLOSURE SITE MONITORING

After reclamation is complete, annual monitoring may take place. If required, the monitoring may consist of soil and water testing, measuring and documenting plan re-growth, examining potential run-off and erosion problems, and checking the stability and condition of the core boxes. Reports, including photographs, will be submitted to the appropriate regulatory bodies. The monitoring will continue as long as the regulating bodies deem it necessary.

| <b>Buildings and Content</b>   |          |         |           |
| All tents and building complexes secured for the winter and cleared of any debris  |          |         |           |
| All office equipment; furniture; kitchen equipment; recreational equipment and other mobile heavy equipment will be winterised and secured                           |          |         |           |
| Any equipment not capable of withstanding the harsh winter conditions will be removed  |          |         |           |
| Area inspected for petroleum spills or contamination.  |          |         |           |
| <b>Water Supply System</b>   |          |         |           |
| Water pumps, filtering systems, water lines and any other equipment associated with the water supply system drained and winterised                                   |          |         |           |
| Water pump shed will be secured.   |          |         |           |
| Area inspected for petroleum spills or contamination.  |          |         |           |
| <b>Sewage System</b>   |          |         |           |
| Greywater system drained (ie. no greywater remaining in the discharge pipe).   |          |         |           |
| Greywater sumps treated if required, filled and recontoured  |          |         |           |
| Privy Pits treated with lye and winterized   |          |         |           |
| Privy Pits secure and cleared of any debris  |          |         |           |
| Area inspected for petroleum spills or contamination.  |          |         |           |
| <b>Waste Incinerator</b>   |          |         |           |
| Incinerator Fuel supply shut off using all valves  |          |         |           |
| Incinerator Fuel in appropriate and functional secondary containment adjacent to the incinerator   |          |         |           |
| Area inspected for petroleum spills or contamination.  |          |         |           |
| Incinerator area cleared of any debris.  |          |         |           |
| <b>Electrical System</b>   |          |         |           |
| Generator shack and surrounding area inspected for signs of spills and remaining wastes such as oil and grease.  |          |         |           |
| Generator shed is lined with enviromat in the event any external spills go unnoticed   |          |         |           |
| Generator drained of fuel and winterized   |          |         |           |
| Generator shack secured for winter   |          |         |           |
| All electrical wires, plugs and sockets which remain in their installed locations are safe and secure  |          |         |           |
| All electrical cords temporarily connected to a buildings or machinery unplugged, rolled and stored  |          |         |           |
| <b>Camp Heating Systems</b>  |          |         |           |
| Each 205 L fuel barrel attached to respective tent or building secured and within secondary containment  |          |         |           |
| Any remaining fuel in lines will be burned out.  |          |         |           |
| Empty propane cylinders ready for transport for refilling or recycling.  |          |         |           |
| Any sleeping quarters converted to electric heat are secured   |          |         |           |
| <b>Petroleum Products and Storage Facilities</b>   |          |         |           |
| All Fuel stored in appropriate and functional secondary containment  |          |         |           |
| All Fuel storage areas clearly marked in the event snow clearing activities are required during spring camp opening  |          |         |           |
| All Fuel storage areas GPS location recorded   |          |         |           |
| All Fuel labelled properly   |          |         |           |
| Area inspected for spills or contamination.  |          |         |           |
| Fuel storage area cleared of any debris.   |          |         |           |
| <b>Chemicals and Hazardous Waste</b>   |          |         |           |
| All chemicals stored in appropriate building or on within appropriate functional secondary containment   |          |         |           |
| All household cleaners properly secured and stored in kitchen and dry.   |          |         |           |
| All empty bags/containers removed for proper disposal  |          |         |           |
| Any remaining waste fuel, oil and grease stored in approved and labelled containers for reuse during summer operations   |          |         |           |
| Any hazardous waste that cannot be reused properly stored, sealed, labels, and prepared for removal  |          |         |           |
| Area inspected for spills or contamination.  |          |         |           |
| Area cleared of any debris.  |          |         |           |
| <b>Spill Response Kits</b>   |          |         |           |
| Spill kit inventory performed  |          |         |           |
| Spill kits not needed over winter relocated to secured building  |          |         |           |
| Spill kits needed over winter (ie. for the remaining petroleum areas) properly stocked and secure  |          |         |           |
| <b>Emergency Response</b>  |          |         |           |
| Fire extinguishers in working order and secure in all necessary locations  |          |         |           |
| Smoke/CO2 detector in working order and secure in all necessary locations  |          |         |           |
| Fire extinguishers used prepared for removal for refilling   |          |         |           |
| <b>Transportation</b>  |          |         |           |
| Transport areas including air strips, helipads, ATV trails, docks and footpaths inspected for spills or contamination.   |          |         |           |
| Vehicles remaining onsite moved into secure buildings  |          |         |           |
| Vehicles remaining onsite winterized   |          |         |           |
| <b>Drill Sites</b>   |          |         |           |
| Diamond drills dismantled and ready for demobilization or secure in designated storage area  |          |         |           |
| Diamond drills remaining on site winterized  |          |         |           |
| Any drill casing unable to be removed flush cut so as to not pose a hazard   |          |         |           |
| Drill sites restored and inspected for any waste, spills or contamination  |          |         |           |
| Drill sites photographed before drilling and after restoration   |          |         |           |
| <b>Documentation</b>   |          |         |           |
| Proper documentation and approvals for all inert and Hazardous waste transport and receiving   |          |         |           |
| Notification to all required authorities of pending seasonal shut down   |          |         |           |
| Baseline samples (ie. water, soil, air quality) collected and all data recorded  |          |         |           |
| Inspections recorded, dated and signed   |          |         |           |
| Photos taken of camp, drill sites, fuel caches and any other important locations/items   |          |         |           |
| Photos of drill lay down storage area  |          |         |           |
| GPS coordinates recorded for camp, fuel storage areas, drill sites, wildlife or habitat sightings, Archeological/paleontological sites or any area/items of interest |          |         |           |
| Descriptions recorded for all wildlife or habitat sightings, Archeological/paleontological sites or any area/item of interest  |          |         |           |
| Year-end inventory of all equipment and buildings left on site   |          |         |           |
| List of all equipment, items and repairs required for next operating season  |          |         |           |

**APPENDIX 3:**  
**Arcadia Bay Property**  
**Example Camp Inventory Record**

Seasonal Camp Shut Down Inventory

Office Tent

| <u>Container</u>           | <u>Item</u>            | <u>Quantity</u> |
|----------------------------|------------------------|-----------------|
| Office Box 1 - Safety Gear | Safety glasses         |                 |
|                            | Ear plugs              |                 |
|                            | Hard hat ear defenders |                 |
|                            | Safety goggles         |                 |
|                            | Dust masks             |                 |
|                            | Respirator masks       |                 |
|                            | Respirator filters     |                 |
|                            | Bug repellent          |                 |
|                            | Bear spray             |                 |
|                            | Plastic rain suits     |                 |
|                            | Mosquito coils         |                 |
|                            | Air horns              |                 |
|                            | Safety vest            |                 |
|                            | Orange gloves          |                 |
|                            | Leather gloves         |                 |
|                            | Rubber gloves          |                 |
|                            | Cloth gloves           |                 |
|                            |                        |                 |
|                            |                        |                 |

| <u>Container</u>          | <u>Item</u>           | <u>Quantity</u> |
|---------------------------|-----------------------|-----------------|
| Office Box 2 - Field Gear | Flagging              |                 |
