**Name of Company filing Annual Report (if different from Name of Licensee please clarify relationship between the two entities, if applicable):**

Tara Gunson, APEX Gescience Ltd., on behalf of Blue Star Gold Corp.

## General Background Information on the Project (\*optional):

The Ulu Gold Project is comprised of the Crown-granted Ulu Mining Lease, L-3563, and the Hood River Mineral Exploration Agreement held with NTI (HoodRiver-0010). Both components of the Ulu Gold Project surface rights are regulated by the Kitikmeot Inuit Association (KIA). The Roma Project is located approximately 40 km north of the Ulu Gold Project in the High Lake Greenstone Belt. The Roma Project comprises Crown claims and a Mineral Exploration Agreement with NTI, which covers approximately 14,000 ha.

Surface activities are licenced by the Kitikmeot Inuit Association (KIA) under one licence, while there is one water licence for Hood River and Roma activities (2BE-HRP1924) and a separate water license for Ulu (2BM-ULU2030).

No water was used or waste disposed under licence 2BE-HRP1924 in 2023.

All of Blue Star's activities, including those occurring on its adjacent Hood River lease and at Roma Gold Project licenced under 2BE-HRP1932, were based out of the Ulu camp in 2023.
