

- i
1. The Proponent shall submit a comprehensive annual report with copies provided to the Nunavut Impact Review Board and Fisheries and Oceans Canada (regulatory branch), by March 31st of each year through construction, beginning March 31, 2022, and a Final Report following completion of the construction activities. This reporting should be coordinated with the reporting occurring in compliance with the *Fisheries Act* Authorization. The annual report must contain at least the following information:
 - a) A summary of activities undertaken for the year, including:
 - a description of local hires, contracting opportunities and initiatives;
 - site photos;
 - any monitoring activities carried out, specifically including monitoring of effects on the marine environment (including but not limited to noise generated by in-water works);
 - b) A work plan for the following year, including any progressive reclamation work undertaken;
 - c) A summary of community consultations undertaken throughout the year, providing copy of materials presented to community members, a description of issues and concerns raised, discussions with community members and advice offered to the company as well as any follow-up actions that were required or taken to resolve any concerns expressed about the project proposal;
 - d) A log of instances in which community residents occupy or transit through the project area for the purpose of traditional land use or harvesting. This log should include the location and number of people encountered, activity being undertaken (e.g., berry picking, fishing, hunting, camping, etc.), date and time; and any mitigation measures or adaptive management undertaken to prevent disturbance;
 - e) A discussion of issues related to wildlife and environmental monitoring, including the number of cease-work orders required as a result of proximity marine mammals and any other wildlife;
 - f) A brief summary of Wildlife Monitoring and Management Plan results as well as any mitigation actions that were undertaken. In addition, the Proponent shall maintain a record of wildlife observations while operating within the project area and include it as part of the summary report. The summary report based on wildlife observations should include the following:
 1. Locations (i.e., latitude and longitude), species, number of animals, a description of the animal activity, and a description of the gender and age of animals if possible.
 2. Prior to conducting project activities, the Proponent should map the location of any sensitive wildlife sites including marine habitat areas in the project area, and identify the timing of critical life history events (i.e., calving, migration, mating, denning and nesting).
 3. Additionally, the Proponent should indicate potential impacts from the project, and ensure that operational activities are managed and modified to avoid impacts on wildlife and sensitive sites.
 - g) An analysis of the effectiveness of mitigation measures for wildlife;
 - h) Summary of any heritage sites encountered during the exploration activities, any follow-up action or reporting required as a result and how project activities were modified to mitigate impacts on the heritage sites;
 - i) Summary of its knowledge of Inuit land use in/near the project area and explain how project activities were modified to mitigate impacts on Inuit land use; and
 - j) A summary of how the Proponent has complied with conditions contained within this Screening Decision, and all conditions as required by other authorizations associated with the project proposal.
