Hello –

Thanks again for taking the time to discuss the upcoming public hearing today. In reviewing the agenda, the GN team noted that there doesn't appear to be a venue for the public to view the presentation on caribou movement.

We recognize that you made an effort in drafting the agenda to place the presentation ahead of other stakeholders in the technical sessions so that they may reference the GN's presentation in their own presentations. We were wondering how best to make this material available to the public.

As part of an attempt to reach the public during the hearing, the GN

- is presenting early in the technical session, immediately following the Proponent
- has shared the presentation with NIRB, the Proponent, and the TAG
- is planning to provide preloaded usb flash drives to distribute
- is planning to set up on-demand viewing at a small workstation

In part because it is difficult to forecast public participation at the technical session on Day 2, perhaps there is room to present to the public during the community roundtable on Day 5?

I'm happy to hear your thoughts on this suggestion, and please let us know if we missed something in the agenda that already addresses this interaction with the public.

Much appreciated,

Justin Buller
