Pond Inlet, Nunavut

baffinlandironmines Baffinland's team of Inuit researchers and WSP Golder marine mammal biologists are studying the potential impacts of our shipping activities on marine mammals. Since the start of the shipping season, they have recorded some of the highest narwhal counts in the Bruce Head area over the 8-year program. On August 14, they witnessed a herding event with over 3,200 narwhal counted in a single day. Beluga, bowhead, ringed seal, bearded seal and walrus have also been seen.

...

Baffinland staff met with representatives of the QIA, and the Nunavut & federal governments last week, to review our 2021 Socio-Economic Monitoring Report. We work closely with these groups to implement the program, based on their valuable feedback. We are listening.

2021

SOCIO-ECONOMIC MONITORING REPORT FOR THE MARY RIVER PROJECT

GCIndigenous and 3 others

Baffinland Iron Mines @BaffinlandIron - Jul 18

[illegible]

After hearing that our staff wanted to help, we asked our site employees 3 voluntary questions:

The thing I like most about my job at Baffinland is that I am always learning new things. I also like working with many different team members.

My job at Baffinland is important to me because I have to support my family. I need gas, and food when I go out on the land, and I love to support my elders!

Baffinland being approved to continue mining 6 million tonnes would mean that we locals can keep our jobs. We might have more Inuit contractors as well!

The thing I like the most about my job here at Baffinland is being given the opportunity to work in different departments. I like being able to help various departments.

My job at Baffinland is important to me. I love being busy. I also am happy that I can support my family.

Baffinland being approved for 6 million tonnes would mean that I am able to continue my wonderful career!

I really like my job at Baffinland because it keeps me busy, and allows for healthy living. I also get to meet lots of new people which I enjoy.

My job at Baffinland is important to me because I am earning an income that can help to support me. My job also keeps me healthy and very active.

Baffinland getting approval to continue to ship 6 million tonnes each year is important to me because it will mean that I can continue to have a steady job, and a steady income. There are hardly any jobs available in my home community.

I like my role at Baffinland, I have a great team here to work with and I am able to live anywhere in Canada. I like my 3x3 rotation as I get to spend time with my kid when I am off. I also provide food and shelter.

My job at Baffinland is important to me because I support my family with my earnings. I am able to have my own place to live in Ottawa. I can still send country food to my parents. I am more independent because of my job here at Baffinland

If Baffinland is approved for 6 million tonnes, it makes a big difference. There are not a lot of jobs in the communities available. There are a lot more opportunities here at Baffinland. Without Baffinland I think it would be sad to see Inuit struggle financially if laid off. Nunavut is not a cheap place to live!

I like being here at Baffinland, I have a career, and it keeps me busy. I also like working with my fellow Inuit.

My job at Baffinland is important to me because I am able to feed my family. I can also purchase vehicles so I can take my family out on the land.

Baffinland being approved to continue to mine 6 million tonnes would mean that I have job security. I would love to work here until I retire!

Darrel Aola
Arctic Bay

The thing I like the most about having a job here at Baffinland is that it keeps me very busy. And on top of that I am earning a good wage.

My job here at Baffinland is very important to me. I need the money that I earn to take care of myself and my family. I have bills to pay, and my child needs things all the time. My job lets me provide.

If Baffinland is approved to continue mining 6 million tonnes it will mean that I can keep my job, and keep going. It will also help our community, and lots of other people will keep their job too!

Pond Inlet's Elders have written an urgent letter to NIRB, expressing full support for Baffinland to expand production to 6 mtpa. They discuss misleading statements to NIRB about our environmental impact & insist that NIRB's recommendation on Phase 2 was based on false assumptions

Dear Ministers Vandal:

RE: Elders of Pond Inlet. Those born between 1945 to 1955 were Knowledge Holders and instrumental in the outlaying the "Vision", for the community of Pond Inlet. Beneficiaries under the Nunavut Agreement are most affected. When Inuit Qaujimajatuqangit are the used as the base, on environmental issues, they have to be heard for the sake of our future.

Meeting Participants: Elijah Naitook, Jayko Alonzo, Sheslie Tagak, Joshua Kanok, Elijah Paupakooduk.

Background

When Mary Elmer Projected stated, those born between 1920 and 1950 were very much in support of Mary Elmer Project. In their letter, that was, those who are actual Nunavummiut did not present strong evidence of what we all heard to say that is the truth.

NIRB decided not to approve Phase 2 was based on assumptions of what the impact would be, and the opponents who came out as negative without our Inuit now more powerful than that of the Inuit.

What is the Truth?

We believe that Nunavut Impact Review Board and the Ministry know what is needed to formulating Beneficiaries of Nunavut Agreement, and certainly for Canada, for growth.

Elmer believes that our Inuit forward, Inuit and Mining Development would lead to work in our Territory.

Elder Elijah Naitook

Elder Elijah Naitook

Qikiqtani Inuit Association then started negotiating and concluding the Inuit Impact Benefit Agreements, which identified what benefits would be forthcoming.

Then recently the Nunavut Impact Review Board decision is not supporting Phase 2 of Baffinland Mine, there was sadness of our Elders, who had hoped to see a positive outcome. This came clear from employment opportunities, training opportunities, future business opportunities, and even future wildlife revenues around the project, that were anticipated, were not going to happen.

Decision Statements for NIRB, that were assumed in Pond Inlet and Igloolik, this is what we heard that were misleading:

Those that were not from Inuit Inlet stated that there were no environmental and that the Inuit were not getting any benefits. That is not true. In the year, 2005-2011, Inuit of Pond Inlet did go over the limit of their environmental. This Inuit and Inuit Association.

Minister Dan Vandal
Minister of Northern Affairs
Government of Canada
Ottawa, Ontario

Dear Minister Vandal;

RE: Elders of Pond Inlet. Those born between 1945 to 1955 were Knowledge Holders and instrumental in the outlaying the, "Vision", for the community of Pond Inlet. Beneficiaries under the Nunavut Agreement are most affected. When Inuit Qaujimajatuqangit are the used as the base, on environmental issues, they have to be heard for the sake of our future.

Meeting Participants: Elijah Nashook, Jayko Alooloo, Sheatie Tagak, Joshua Katsak, Elijah Panipakoocho.

Reasons:

When Mary River Projected started, those born between 1928 and 1945 were very much in support of Mary River Project, for they knew that through the Nunavut Agreement which was negotiated by Inuit, there would be opportunities for employment for Inuit and Inuit Businesses would also benefit, for these were already put in place so our future generations will have opportunities to have employment, and growth benefits to the communities. This would not only benefit Nunavut, but also Canada as a whole.

In the years between 1923 and 1964, there was a seasonal coal mining in the vicinity of the now, community of Pond Inlet. This benefited a lot of families, living in the vicinity of Pond Inlet, Arctic Bay, Igloolik, and Clyde River. When Mary River started, there was expectations from the community that employment and benefits would flow as they did in the past.

Therefore, when Baffinland started in 2000, the Elders were very happy that there would be more employment opportunities for the community. Qikiqtani Inuit Association then started negotiating and concluding the Inuit Impact Benefits Agreements, which identified what benefits would be forthcoming.

Then recently the Nunavut Impact Review Board decision in not supporting Phase 2 of Baffinland Mine, there was sadness of our Elders, who had hoped to see a positive outcome. This came clear that employment opportunities, training opportunities, future business opportunities, and even future wildlife monitors around the project, that were anticipated, were not going to happen.

Decision Statements by NIRB, that were announced in Pond Inlet and Iqaluit, this is what we heard that were misleading:

Those that were not born in Pond Inlet stated that there were no more narwhales and that the hunters were not getting any narwhales. That is not true at all! In the year, 2020-2021, Inuit of Pond Inlet did go over the limit of their narwhale quota. The Fisheries and Oceans did in fact had to give them from previous year's quotas to make the difference. Pond Inlet residence over harvested that year, 2020-2021.

Concerning seals, the numbers have not changed, those hunted have not decreased or have risen in numbers.

Concerning caribou, Inuit have known that they have a cycle of migration, that usually takes about 50 years before they return to where they had left, following their migration routes. They would go far distances to other

lands. We are now hearing that the caribou are now coming back as know in Inuit Qaujimajatuqangit.

Environmental Impact Statements:

There are comments and statements that mining affects wildlife both terrestrial and marine, but we, as Elders know, the truth. We know that both Department of Environment, and Fisheries and Oceans did not in their written submissions, present strong evidence, to believe, and like wise, those who are actual Nunavummiut did not present strong evidence of what we all heard to say that is the truth.

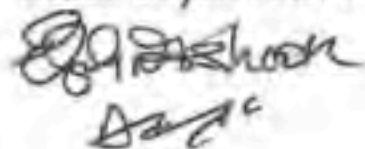

NIRB decision not to approve Phase 2 was based on assumptions of what the impact would be, and the opposers who came out so negative about our future was more prevailing than that of the truth.

Where is the Truth?

We believe that Nunavut Impact Review Board and the Minister know what is needed in Nunavut, Beneficiaries of Nunavut Agreement, and certainly for Canada, for growth.

Elders believe that and looks forward, for Inuit and Mining Developments working hand in hand in our Territory,

Elder Elijah Nashook

Letter of Support for Baffinland Iron Ore Mines Request to Continue Shipping 6.0 Million (mtpa)

In the past the Hamlet of Arctic Bay supported Baffinland Iron Mines Corporation's Phase 2 Application. The Hamlet continues to support this application. The Hamlet of Arctic Bay is aware that N.I.R.B. final report and ministerial recommendations have been completed.

Based on information from the report and the recommendations the Hamlet of Arctic Bay has and will continue to communicate with Baffinland regarding what will be the next actions required to continue to move the project in a position direction with a positive outcome.

The Hamlet is of the understanding that Baffinland had requested support from the Federal Ministers to the Board to modify Project Certificate No. 005 to authorize the transportation and shipment of 6 million tonnes of iron ore per annum (mtpa), and that term and condition 179 (a) and (b) of the project certificate be updated to reflect this authorization.

The Hamlet has also received a copy of the response from the Honourable Minister Daniel Vandal, P.C., M.P.'s dated May 20, 2022, in which he advised that " Baffinland can request from the Board a reconsideration of the Project Certificate pursuant to section 112 of the Nunavut Planning and Project Assessment Act"

At a Council meeting held on June 9, 2022, a motion was passed in support of Baffinland's application, which read:

" **WHEREAS** Baffinland Iron Mines Corporation (B.I.M.) has indicated that they are applying to the Nunavut Impact Review Board (N.I.R.B.) to have permission to ship 6.0 million metric tons per annum (mtpa) through Milne Inlet continue for the 2022 shipping season." and

" **WHEREAS** BIM is requesting that community organizations from impacted communities consider providing them with a letter of support for their application to N.I.R.B."

"**THEREFORE**" it be moved that Hamlet Council authorize the mayor to sign a letter of support for B.I.M.'s application to N.I.R.B.

The Hamlet's understanding is that Baffinland requires a positive decision on their application to be able to continue to operate through to the end of this June and beyond. Therefore, Council and I would like to encourage the N.I.R.B. to review and make the decision as the situation is now urgent.

The Hamlet of Arctic Bay has residents employed by Baffinland, 16 Inuit employees that work for contractors and 27 that work for Baffinland Iron Ore Mine. The salaries they receive goes towards supporting their families. As one of the smaller communities in Nunavut there are not many other opportunities for local employment. Arctic Bay views Baffinland Mining as a economic benefit to the community in the employment and training of its residents and the donations of funds and equipment to various charitable organizations and sporting groups.

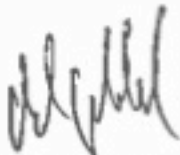

If the mine ends up in a care and maintenance position because a timely response was not received it will have a severe impact on the economy of Arctic Bay.

In addition, the Hamlet's understanding is that Baffinland needs to invest a large amount of capital to construct the railway. This railway is essential to the future of Baffinland. Again, the impact of the mine, if it goes into a care and maintenance mode, would mean the ability to finance the cost of the railway may not materialize.

As Mayor of Arctic Bay, I urge the N.I.R.B. to quickly approve the mine's ability to continue to produce and ship 6.0 million (mtpa) through Milne Inlet for the year 2022 and in future years

The Hamlet of Arctic Bay would like to thank you in advance for your consideration of this matter.

Yours truly,

Mayor Moses Oyukuluk

The thing I like best about my job at Baffinland is that I can be busy, making food for others with love. I like putting a smile on others peoples faces, even if they are having a bad day. I think I am part of the reason why people want to stay, and I like that!

My job at Baffinland is important to me because it is one of the best choices I have ever made to come here to work. It allows me to support my two children. I get to send money home to my kids which makes me very happy.

Baffinland being approved to continue to mine and ship 6 million tonnes is important to me because this is one of the best jobs I have ever worked at. I want to keep this job, and I want other people to have the opportunity to come here to work. I have worked in kitchens for over 12 years, and here at Baffinland it is great, friendly, and supportive. Nice to see new people all the time. I love it

From 1996 to 1999, as there is no specific final financial statement of the institution from the Observatory itself, there is no data available. The only data available are the 1999-2000 report that is the equivalent of a final account of the Observatory. In examining the report, we can see that the Observatory, while the lack of financial data is clear, it would have a strong impact on the community. World Bank and other financial institutions would be interested in the data and would be in a position to provide the necessary financial data to the Observatory.

Substantive was restricted to making significant investment in infrastructure or financial assistance (Phase 2 proposal) or support. These included the presence of a training centre where people would be employed and at least 20 people would be trained over 18 months, the building of a garage where three alternative models for assistance and community centres, would be provided with free fuel to reach 100 km, expanding the building of a day-care centre to 100, they also had committed that they develop a research centre valued at \$200,000 by the community. Additionally, 100,000 litres of water to be provided were used as evidence of positive relations between Spanish and Lebanese and the primary sector with large oil and mineral exploration in the area. With these two letters only a modest commercial effort, these infrastructure investments from the support of financing (Phase 2 proposal) would have been both combined.

ultimately are converted to the achievement of an organization's management goals, since it is the only way that an organization can control its future. In the company, one would expect that such an adaptive management system in the form of a built-in model helps ensure that a firm's management efforts will be directed to the correct goals.

One of the reasons why the Council indicated that many of his own gas stations do not use credit money (and it is obvious and the point of what this is) is to encourage the more traditional, as many of them there are very few people today that are willing to use credit and most people today that do use credit are not willing to use it. The second thing they are doing is to encourage the support of the Council's Plan 1 is to support.

The former largely dismissed the idea that the 1990s was a period when immigrants' lives were the most difficult. He said that the 1990s was a period when immigrants' lives were the most difficult, but that the 1990s was a period when immigrants' lives were the most difficult.

It is comforting that the Government of Ontario's position aligns with the findings of the study. However, it is important to note that the government has also expressed its commitment to supporting the development of the province's economy.

December 20, 2021

Final Written Submission of Hamlet of Sanirajak-Nunavut Impact Review Board's Review of the Baffinland Iron Ore Mines Phase 2 Proposal (NIRB File No.: 08MN053)

The Hamlet of Sanirajak has adopted the formal position of being in favour of Baffinland Iron Ore Mines Phase 2 Proposal (NIRB File No.: 08MN053).

There have been as many as 80 people from Sanirajak working at the Baffinland Iron Ore Mines' Mary River mine. This makes Baffinland Iron Ore Mines continued operations critical for the livelihood of a large portion of Sanirajak's population. For a relatively small community like Sanirajak, were the loss of these jobs to occur, it would have a devastating impact on the community. Should Baffinland's Phase 2 proposal not be approved and the mine closes, there are no potential employers that would be able to replace the jobs for these Sanirajak residents.

Baffinland has committed to making significant investment in infrastructure in Sanirajak should their Phase 2 proposal be approved. These including the creation of a training center where seven people would be employed and as many as 20 people would be trained every six months, the building of a garage where three apprentices would be employed and community residents would be provided with free labour to repair their equipment, the building of a daycare and an office. They also have committed that they would buy a research vessel valued at \$300,000 for the community. Additionally, Baffinland has committed to providing assistance with the erection of repeater towers between Igloolik and Sanirajak that will greatly assist with Search and Rescue operations in the area. With Sanirajak having such a massive infrastructure deficit, these infrastructure investments that the approval of Baffinland's Phase 2 proposal would bring are badly needed.

Baffinland provides funding for the Ilaglitunit Fund that offers program funding of \$1.1 million per year to strengthen Inuit communities and families and create job readiness, a \$750,000 Wildlife Compensation Fund, a \$275,000 Business Capacity Start-up Fund, a \$300,000 school lunch program and a \$300,000 Community Counsellor program.

Since 2015, Baffinland has spent \$11,562,804 on wages to Sanirajak residents with as much as \$2.75 million in a single year and the total value of contracts awarded to Sanirajak businesses since 2018 totaling \$42,935,369. They also have provided \$124,500 to the local Co-op under the charter flight contract and \$57,000 in office rental to the Hamlet. They have spent over \$156,260 on the Sponsorship / Donations Program providing support for various community needs such as an elder gathering in 2019, COVID-19 food relief and fishing derbies. They also supplied lots of cleaning supplies to residents during the COVID-19 pandemic and they regularly have provided support for such things as Christmas food

hampers and flying hockey teams to tournaments as well. Clearly Baffinland Iron Ore Mines has demonstrated that they are an extremely good corporate citizen by providing support to communities in many ways.

There have been environmental concerns raised as arguments for why the Phase 2 proposal should not be approved. In particular, the residents of Pond Inlet have indicated that they are concerned about the environmental effects observed, particularly those on Narwhal. It is clear that global warming is having an impact on the Narwhal population. With much more open water, there has been increased predation from killer whales. With the year after year depletion of ice cover that Narwhal need to be safe from killer whales, it is not clear whether in the long term there would be any Narwhal in the area even if the mine were to close. Should Baffinland's Phase 2 proposal not be approved and the mine closes followed by all the Narwhal leaving the area because of killer whale predation, the closure of the mine would have been for nothing.

Baffinland has committed to the establishment of an adaptive management process where Inuit are the ones that will have decision making control rather than the company. One would expect that such an adaptive management system in the control of Inuit would help ensure that adverse environmental effects will be mitigated to the extent possible.

One of the elders on the Council indicated that many of his own grandchildren do not eat much country food at all anymore and that most of what they eat is bought from the store. Additionally, he indicated that there are very few people today that are full-time hunters and that most people today rely on wage employment to survive. He stated that these were some of the reasons that he supports Baffinland's Phase 2 proposal.

The Council carefully considered that if Baffinland's Phase 2 proposal were approved, then after the construction of the railway to Steensby Inlet and the port there, there would be 18 million metric tons of iron ore per year being shipped through the waters off the coast of Sanirajak. While this might raise concerns in the future, the far more urgent concern for the Council is all its residents' wage employment at the mine now that would be lost should Baffinland's Phase 2 proposal be denied.

It is worth noting that the Government of Nunavut's position throughout the Baffinland Phase 2 review process has been that they support its approval. They expressed that they are extremely concerned about the potential job losses and the devastating impact that it would have on Nunavut should the mine close. Should this project not proceed, it would provide an extremely negative signal to the investment community that Nunavut is not a very investment-friendly place to do business. This could result in slow economic development for Nunavut for many years to come. The Hamlet of Sanirajak agrees with the Government of Nunavut's position.

For the reasons cited above, the Hamlet of Sanirajak urges the Nunavut Impact Review Board to recommend to the Minister of Northern Development to approve Baffinland Iron Ore Mines Phase 2 Proposal.

Further, the Hamlet of Sanirajak urges the Minister of Northern Development to approve Baffinland Iron Ore Mines Phase 2 Proposal irrespective of what the Nunavut Impact Review Board's recommendation on the file is.

Approved by Council for submission to the Nunavut Impact Review Board on December 20, 2021:

Mayor Jaypetee Audlakiak

[#MyVoiceMatters](#)

I like my job at Baffinland very much. It keeps me very busy everyday stocking the shelves with healthy snacks and fruits. I am able to do my part to help take care of my fellow employees here at Mary River.

My job at Baffinland is very important to me because it helps me to be able to support my family, it lets them be able to buy food from the stores.

Baffinland being approved to continue mining 6 million tonnes will mean that we are all able to keep our jobs. More jobs may be available for Inuit. Baffinland can keep supporting our communities, which they have been doing very much.

Having this job here at Baffinland means that I can see lots of my family members from other communities on a regular basis.

My job at Baffinland is important to me because there are no jobs available in my home community. It is also important because I can provide extremely well for my family.

Baffinland being approved to continue mining 6 million tonnes would mean job security for me. I could keep my job!

Nora Muckpa
Arctic Bay

The thing that I like best about my job at Baffinland is that I get to keep being busy and I also make very good money.

My job at Baffinland is important to me because it allows me to help support the people at home that have supported me over the years.

Baffinland being approved to continue to ship 6 million tonnes of iron ore each year is important because it will allow us to continue working and earning an income meeting family at work and people that we are only just getting to know.

The union for 1000+ Baffinland staff is urging NIRB & the fed. gov't to "do the right thing" & approve our 6.0 Mtpa request after termination notices were issued. @iuoelocal793 blames regulators for dragging their feet with livelihoods on the line.

Read: bit.ly/3bw7CZN

[illegible][illegible]

For the 2nd year in a row, Baffinland delayed the start of shipping season until icebreaking was not required. With Inuit input, our mitigation measures to reduce the impact on narwhal include narrow shipping lanes & speeds of only 9 kn.

Baffinland is using new mitigation measures, to protect narwhal along the Northern Shipping Route. Ships travel as convoys when feasible, to reduce total underwater sound exposure. Drifting is avoided when possible, and a maximum of 3 ore carriers will anchor at Ragged Island.

UPDATE: Thank you to Nansen Polar Expeditions for explaining why their vessel was behaving in this way. We are pleased crew were in communication with the community. We encourage more dialogue with all involved about vessel activity & safety in the area. Here is their statement:

We at Nansen Polar Expeditions take very seriously maintaining good relationships with all stakeholders in the local communities, and to always follow local and federal guidelines and regulations. We have engaged directly with the community of Pond Inlet, including with the hunters, throughout, and received permissions and permits required. During the vessel's time in the area, it was working around low pressure systems with 50 to 70 knots of wind, and ice conditions which, in the interests of safety, kept the vessels in a smaller geographic area. Most significantly, the vessel's movements were openly communicated with the members of Pond Inlet, and the vessel was in frequent touch with hunters, and specifically reached out to them before entering an exclusion zone due to the prevailing conditions.

Audun Lie Dahl
CEO, Nansen Polar Expeditions

Baffinland has implemented new measures to mitigate our potential impact on the marine environment this shipping season. No more than 80 ore carriers will be chartered – down from 86. Our vessels follow an established Northern Shipping Route, and limit speeds to 9 knots or less.

William Amagoalik
Pond Inlet

The thing I like most about my job at Baffinland is that I am employed and get paid twice every month!

My job at Baffinland is very important to me because it helps me to support my family. The job also allows me to be at home for 3 weeks after working 3 weeks!

Baffinland getting approved to continue to mine 6 million tonnes each year is important because all of the impacted communities will continue to receive benefits.

Baffinland would like to thank the Hunters and Trappers Association of Sanirajak, also known as Hall Beach, for their letter to the Nunavut Impact Review Board, supporting our application to continue 6.0Mt in 2022]. We urge the Minister of Northern Affairs to take note.

ከመጨረሻው ጀምሮ ለሰላም ስሜት ሲገለጽ

Baffinland Iron Mines @BaffinlandIron · Aug 9

...

After hearing that our staff wanted to help, we asked our site employees 3 voluntary questions:

“What do I like most about my job?”

“Why is my job important to me?”

“What does Baffinland being approved to mine 6 Mtpa mean to me?”

Here are their answers.

[#MyVoiceMatters](#)

The thing that I like the most about my job at Baffinland is it keeps me busy, it allows me to help other people. I love being a dishwasher at Baffinland!

My job at Baffinland is very important to me because it lets me support my family. It also gives me a chance to get away from my community for a little while. I love working at Mary River, and I like being able to help my family!

Baffinland's Shipping Monitor team has tracked an [@HLCruisesInt](#) cruise ship sailing at excessive speeds of 13 knots in Tay Sound, which opens to Eclipse Sound and Pond Inlet. Baffinland ships stay in a defined shipping lane and are restricted to 9 knots.

@Oceans_North @WWF

Members of Baffinland's Shore-based Monitoring Program, who study narwhal response to shipping along the Northern Shipping Route, were thrilled to capture these amazing images, taken near Bruce Head, after the start of our shipping season.

On this International Day of Indigenous Peoples, Baffinland celebrates the rich cultures and traditions of the Indigenous Peoples in Canada and around the world. The UN created this day in 1994, to protect and promote Indigenous rights.

[illegible][illegible]

Baffinland continues to use tailored mitigation measures to further protect marine mammals along the Northern Shipping Route, including defined shipping lanes, a maximum of 3 vessels anchored at Ragged Island, and no drifting in Eclipse Sound, unless warranted for safety.
