The intertidal area is a sandy beach with intermittent boulders

[illegible]

Typical of sandy intertidal shores in Nunavut, there is low biodiversity.

[illegible]

NA, this is a field program that is small scale with minimal footprint. A local operator will be hired to support the field program.

List of Project Geometries

Approximate location of test pits require for the Program. Kinngait is located 1 point on Dorset Island near Foxe Peninsula at the southern tip of Baffin Island in the Qikiqtani Region of Nunavut.
