### **Access Trail Project Chesterfield Inlet**

<b>Type de demande :</b>	New
<b>Type de projet:</b>	All-Weather Road / Access Trail
<b>Date de la demande :</b>	7/31/2023 7:33:54 PM
<b>Period of operation:</b>	from 0001-01-01 to 0001-01-01
<b>Autorisations proposées:</b>	from 0001-01-01 to 0001-01-01
<b>Promoteur du projet:</b>	David Kattegatsiak Hamlet - Chesterfield Inlet P.O. Box 10 Chesterfield Inlet Nunavut X0C 0B0 Canada Téléphone :: 8678989206, Télécopieur :: 8678989108

## DÉTAILS

## Description non technique de la proposition de projet

Anglais: The Hamlet of Chesterfield Inlet (the Hamlet) is interested to build road infrastructure to support the development of a series of gravel sites. The intention of the gravel sites is to support community maintenance activities (e.g., road and airport runway maintenance, development of housing pads/commercial lots) within the Hamlet. Dynamic Ocean Consulting Ltd (Dynamic Ocean) has been retained by the Hamlet to support with regulatory approvals from Authorities Having Jurisdiction (AHJs). Approval from AHJs will be required for the portions of the road infrastructure that extend outside of the municipal boundaries. Several access trail routes to new quarries are being considered, all of which will be constructed entirely outside of municipal boundaries. The Hamlet will be responsible for the construction of the access roads and utilization of the gravel material. Construction is dependent on funding opportunities with the territorial and federal governments, however, the Project is expected to initiate in 2024. Construction of the full extent of the road may occur gradually over a period of 10 years. In total it is expected that construction can be completed in approximately 40 days but as above, may occur gradually over a period of a decade. Construction will be undertaken during 12-hour day shifts, seven days a week. It is anticipated that construction will require six to 10 construction workers.

## Personnel

Personnel on site: 10

Days on site: 40

Total Person days: 400

Operations Phase: from 2024-06-20 to 2034-06-20

Operations Phase: from 2024-06-20 to 2034-06-20

### Post-Closure Phase: from to

## Activités

Emplacement	Type d'activité	Statut des terres	Historique du site	Site à valeur archéologique ou paléontologique	Proximité des collectivités les plus proches et de toute zone protégée
approximate road location	Access Road	Municipal	Chesterfield Inlet is a hamlet located on the western shore of Hudson Bay in the Kivalliq Region of Nunavut, Canada, at the mouth of Chesterfield Inlet. Chesterfield Inlet it is the oldest community in Nunavut.	An Archaeological Impact Assessment will be undertaken prior to construction of the Project	N/A

### Engagement de la collectivité et avantages pour la région

Collectivité	Nom	Organisme	Date de la prise de contact
Information is not available			

# Autorisations

Indiquez les zones dans lesquelles le projet est situé:

Kivalliq

## Autorisations

Organisme de régulation	Description des autorisations	État actuel	Date de l'émission/de la demande	Date d'échéance
Kivalliq Inuit Association	Should the selected Access Trail pass through Inuit Owned Land, a Right of Way approval will be required.	Not Yet Applied		
Office des eaux du Nunavut	A Type B license will be required for construction of roads where culverts or water crossings over water bodies are required.	Not Yet Applied		
Autre	Class 2 Archaeologist Permit from GN - Culture and Heritage to confirm construction will not impact any important archaeological features and, if required, an AIA will be undertaken prior to construction.	Not Yet Applied		
Gouvernement du Nunavut, Services communautaires et gouvernementaux	A Land Use Permit will be required from GN-CGS if any of the selected Access Trail passes through Commissioners land.	Not Yet Applied		
Pêches et Océans Canada	A project Request for Review (RFR) will be submitted should the project involve water crossings, or if culverts are fish bearing, or if any project components occur in-water or near-water that have the ability to result in harmful alteration,	Not Yet Applied		

	disruption, or destruction to fish or fish habitat.			
Hamlets and Municipalities	Quarry permit	Not Yet Applied		

#### Project transportation types

Transportation Type	Utilisation proposée	Length of Use
Land	Project personnel will travel to construction areas via land.	

#### Project accomodation types

Collectivité

## Utilisation de matériel

Équipement à utiliser (y compris les perceuses, les pompes, les aéronefs, les véhicules, etc.)

Type d'équipement	Quantité	Taille – Dimensions	Utilisation proposée
Loader	1	20.25ft H x 7.91ft.W	Access trail
Cat	1	14.95 ft. L x 7.65 ft. W	Access Trail
Dump Truck	1	21 ft. L x 8.5 ft. W	Access Trail

### Décrivez l'utilisation du carburant et des marchandises dangereuses

Décrivez l'utilisation de carburant :	Type de carburant	Nombre de conteneurs	Capacité du conteneur	Quantité totale	Unités	Utilisation proposée
Diesel	fuel	1	1000000	1000000	Liters	Mobile equipment, generators and heaters
Gasoline	fuel	1	5000	5000	Liters	Proposed use Mobile equipment, generators and heaters
Propane	fuel	5	20	100	Liters	heaters
Lubes and Oils	hazardous	10	5	50	Gallons	Maintenance of mobile equipment

### Consommation d'eau

Quantité quotidienne (m3)	Méthodes de récupération de l'eau proposées	Emplacement de récupération de l'eau proposé
0		

# Déchets

## Gestion des déchets

Activités du projet	Type des déchets	Quantité prévue	Méthode d'élimination	Procédures de traitement supplémentaires
Access Road	Déchets combustibles	2 tons	Hamlet landfill	N/A
Access Road	Déchet dangereux	2000 litres	Returned to the south in sealed drums or lined bags, transported in 20' shipping containers and disposed of according to regulatory procedures.	N/A
Access Road	Déchets non combustibles	0.5 tons	Hamlet landfill	N/A
Access Road	Mort-terrain (sol organique, déchets, résidus)	negligible	quarry	N/A

### Répercussions environnementales :

A description of the potential environmental impacts, as well as mitigation and monitoring measures, are presented in Sections 3 and 4 of the attached supplementary letter (LET-CHES-01-NIRB Application Letter-0001-23.R0). An Environmental Effects Table is also provided in Appendix A of the attached supplementary letter, outlining activity-specific environmental impacts.

### **Description de l'environnement existant : Environnement physique**

### **Description de l'environnement existant : Environnement biologique**

Potential environmental impacts are described in Section 3 of the attached supplementary letter (LET-CHES-01-NIRB Application Letter-0001-23.R3).

### **Description de l'environnement existant : Environnement socio-économique**

Potential social impacts are described in Section 3 of the attached supplementary letter (LET-CHES-01-NIRB Application Letter-0001-23.R3).

### **Miscellaneous Project Information**

### **Identification des répercussions et mesures d'atténuation proposées**

Mitigation measures are described in Section 4.1 of the attached supplementary letter (LET-CHES-01-NIRB Application Letter-0001-23.R3).

### **Répercussions cumulatives**

Impacts

Identification des répercussions environnementales

	PHYSICAL												BIOLOGICAL												SOCIO-ECONOMIC											
	Designated environmental areas												Wildlife, including habitat and migration patterns												Archaeological and cultural historic sites											
	Ground stability												Birds, including habitat and migration patterns												Employment											
	Permafrost												Aquatic species, incl. habitat and migration/spawning												Community wellness											
	Hydrology / Limnology												Wildlife protected areas												Community infrastructure											
	Water quality												Vegetation												Human health											
	Climate conditions												Wildlife, including habitat and migration patterns																							
	Eskers and other unique or fragile landscapes												Wildlife, including habitat and migration patterns																							
	Surface and bedrock geology												Wildlife, including habitat and migration patterns																							
	Sediment and soil quality												Wildlife, including habitat and migration patterns																							
	Tidal processes and bathymetry												Wildlife, including habitat and migration patterns																							
	Air quality												Wildlife, including habitat and migration patterns																							
	Noise levels												Wildlife, including habitat and migration patterns
