TITLE: Impacts of Wastewater at Baker Lake, Nunavut

**OBJECTIVES OF RESEARCH:**

The overall objective of this research program is to understand the impacts of the Baker Lake, NU, wastewater treatment system on environmental and human health, and develop recommendations for improving wastewater management in the community. The research program will employ a holistic approach to characterize the impacts of the current wastewater treatment system on environmental and human health. Samples of water, sediment, and biota will be collected and analyzed for a suite of chemical and biological parameters.

**TERMS & CONDITIONS:**

The holder of the license will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report (NIRB File # 18YA019) and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this license.

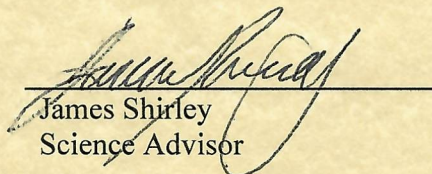

**DATA COLLECTION IN NU:**

DATES: June 15,2025 to September 15,2025

LOCATION: Baker Lake

Scientific Research License 03 005 25R-M expires on December 31,2025

Issued at Iqaluit, NU on January 25,2025
