### Avatiliriniqmut Ayurhautingit:

It is an access trail to a campsite. The trail will be 3 km. This will impact the environment by being an gravel access trail. No land will be dug up, gravel will be brought to site and put onto the tundra to create an access trail. The gravel will only be applied to the trail and to no other location. The access trail will be half a meter depth and 6 meters wide. The trail will not be going over any bodies of water only over the tundra.
