Re: Responding to the comments from May 10, 2024

Question #1

The location where the material was collected was access from AEM during the Project description?

Question #2

Revise application the application to improve existing access trail.

Question#3

Pulaarvik Kablu Friendship Centre institution Agree with AEM to close the road during migration therefore cumulative effect do not apply in this small existing trail. Models for accumulative effect are done for major development project.

Question #4 and 5

Management plan

Pulaarvik Kablu Friendship Centre have agree with AEM to follow AEM management plan for the access trail also for the spill in site.

Question #6

During our traditional knowledge assessment, the Elder Johnny Ayaruaq and Alice Ipkanak had been interviewed, and that they needed to Identify the location that it is not an archaeological site's or are close to the road that is a 3 km from the access trail please see attach minutes during the field work.

Question # 7

FOR OUR TRADITIONAL KNOWLEDGE INTERVIEW WITH THE ELDERS IN THE FIELD THE ACCESS TRIAL IN QUESTION HAS BEEN USE FOR SEVERAL YEARS PULAARVIK ONLY WILL IMPROVE THE ACES TRAIL DURING THE SUMMER.
