TITLE: Case 24 Vendom Fiord

### OBJECTIVES OF RESEARCH:

The project named “CASE 24 Vendom Fiord” is a joint geological project of the German Federal Institute for Geosciences and Natural Resources, Hannover, Germany, and the Geological Survey of Canada (GSC Calgary). The research team will be led by Dr. Lutz Reinhardt (BGR). The main focus of BGR’s long-term research program CASE ( Circum-Arctic Structural Events) is research in the circum-Arctic continental land areas to better understand the origin and opening of the Arctic Ocean causing today’s distribution of sea and land, which characterises the Arctic landscape and climate we currently know. Throughout Earth’s history, continents have moved continually across its surface, and modern geography is only a snapshot in time of Earth’s surface. Until now, the development of the Arctic Ocean and its surrounding continents is not entirely understood.

TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report (NIRB File # 23YN074) and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence.

## DATA COLLECTION IN NU:

DATES: July 15,2025 to August 15,2025

LOCATION: Ellesmere Island

Scientific Research License 02 010 25R-M expires on December 31,2025

Issued at Iqaluit, NU on January 21, 2025
