Dear Cassel Kapolak, Mosha Cote, Wynter Kuliktana, and Emily Koide:

RE: NPC File # 150457 [Cambridge Bay Air Quality]

The following works and activities have been proposed in the above-noted project proposal:

1. Polar Knowledge Canada and Environment and Climate Change Canada are proposing to install monitors to measure particulate matter (PM 2.5, PM 10 and black carbon) in the community of Cambridge Bay, Nunavut. The project will involve:
 - Deploying small particulate matter sensors and black carbon sensors in strategic areas of the community.
 - Sensors will be installed on top of the streetlights or on buildings/posts and removed at the end of the project. Sensors will also be installed in the high school or community hall to monitor differences in indoor air quality. The proposed pilot project will span three years (2024 – 2027).
2. Location: Kitikmeot Region; [Municipality of Cambridge Bay]

A complete description of the project proposal reviewed by the NPC can be accessed online using the link below.

The Nunavut Planning Commission (NPC) has determined that this project proposal is outside the area of an applicable regional land use plan. The project proposal requires screening by the Nunavut Impact Review Board (NIRB) because it does not belong to a class of exempt works or activities set out in Schedule 12-1 of the Nunavut Agreement.

By way of this letter, the NPC is forwarding the project proposal to the NIRB for screening. Project materials are available at the following address: <https://lupit.nunavut.ca/portal/registry/registry.aspx?appid=150457>

This decision applies only to the above-noted project proposal as submitted. Proponents may not carry out projects and regulatory authorities may not issue licenses, permits and other authorizations in respect of projects if a review by the NPC is required.

If you have any questions, please do not hesitate to contact me at (867) 447-4563.

Sincerely,

A handwritten signature in blue ink, consisting of the letters 'S' and 'A' connected by a horizontal line.

Solomon Amuno, PhD
