Good morning,

I apologize, I thought the deadline was today.

I'm on travel right now, but here are our comments for this file:

Our board does not support this project:

- the work is taking place in key caribou migration routes
- Our caribou populations are coming back up, we need to ensure that they continue
- The helicopter noise will have an impact on all animals
- Work occurs close to the Coppermine River- our main source of drinking water
- Caribou may migrate early again as they did in 2024

If you have any questions, please let me know

Amanda
