Good day Adrian,

Thank you for providing your responses to the additional information request issued by the NIRB regarding your application #126010 Taloyoak Sealift Improvement along with your application on February 6, 2025.

The NIRB has reviewed your application materials and now requires clarification regarding the following to determine the scope of the project.

1. Will the Government of Nunavut — the Department of Community and Government Services, or the Hamlet of Taloyoak, operates and maintains the proposed project?

Context: The proponent stated in its application that construction is to occur between the months of June and October over the span of two years with the first year (2025) on developing granular materials and the second (2026) on deposition of materials in the marine waters. The project is proposed for an operation window of 30 years (2026 to 2056). The proposed project is a permanent marine infrastructure that foresees routine maintenance for safe operations. It is understood that EXP Services is responsible for the construction of the proposed project. It is not explicitly stated in the application what entity (i.e. legal person - individual or organization) is responsible for the operation (including maintenance) of the proposed project.

2. Will the proponent construct, use, and/or decommission temporary camps for the construction of the proposed project?

Context: The proponent has identified in the **Activities** section of the application that the camp area used by the Pilitak Enterprise Inc. is the "desired location for additional camps". The Pilitak Enterprise Inc. currently uses the area to house the crew for the construction of the new school till August 2026. Please clarify if the proponent will construct and use new camp facilities in the identified area near the new school, if so, what's the accommodation capacity (more or less than 20 beds?); or will the proponent use the existing facilities by the Pilitak Enterprise Inc.?

Thank you for providing the information to-date to the NIRB. We look forward to hearing from you. If you have any questions, the NIRB staff are happy to meet and chat. Please reach out.

Cheers,
Leila
