

**Project proposal No. 126035, File No. 25YN003**

**Communities/places**

We continue to intend to carry out surveys in all the following places/communities:

- Resolute Bay
- Pond Inlet
- Cambridge Bay
- Qikiqtarjuaq
- Eureka, and
- Alert

Note that we already had multiyear NIRB and NRI permits for surveys in Resolute, Pond, Qik, Eureka and Alert, and Cambridge Bay should be added in 2025.

**Project duration**

We plan to carry out such surveys for at least another two years (note that we have been doing this at least since 2017, in continuation of the surveys I started as a Canada Research Chair in 2007), and therefore it would be great to approve the project for five years and to renew it on an annual basis during that time.
