Re: Resuming Somerset Trough Project (24EN005) activities in 2025

Hello,

As per my phone call with Keith Morrison on February 4, 2025, I am writing to inform the Nunavut Impact Review Board (NIRB) that Bronzite Exploration plans to resume project activities for the Somerset Trough Project in 2025 completely within the scope of NIRB's previous Screening Decision Report (24EN005) dated April 19, 2024.

The mineral exploration program that was screened by NIRB and originally scheduled to be conducted between March 2024 and September 2024 was delayed and no field and land use activities were carried out in 2024. Bronzite now intends to conduct the previously screened activities between March 2025 and September 2025, with no change in project scope or activities.

Bronzite will conduct all activities during the 2025 field program pursuant to the Terms and Conditions determined by NIRB in the previously mentioned Screening Decision Report.

Thank you and please reach out to me directly at (647) 402-7356 or sam.robb@bronziteexploration.com if there are any questions or further information required.

Sincerely,

A handwritten signature in black ink, appearing to read "S. Robb", with a stylized flourish at the end.

Samuel Robb
Director & Vice President, Exploration
Bronzite Exploration Corp.
