11-Apr-2025

Dear Pierre-Marc Godbout,

On April 10, 2025, the Nunavut Impact Review Board (NIRB or Board) received a referral to screen Natural Resources Canada's (NRCan) "Impacts of Past Glacial Ice Sheets" project proposal from the Nunavut Planning Commission (the Commission), with an accompanying positive conformity determination with the Keewatin Regional Land Use Plan.

The NIRB processes applications through the Public Registry and as a result the NIRB requires the proponent to complete the online application form. On the NIRB Public Registry all project assessments have a unique individual page called a Project Dashboard, the information provided in your application populates this project dashboard allowing all documentation more accessible in English, Inuktitut, Inuinnaqtun, and French. The online application can be accessed by registering and account at [www.nirb.ca](http://www.nirb.ca) through the link found in the upper right-hand corner of the webpage. Accounts will require approval prior to having access to the online application (usually less than 24 hours).

**Please keep your project title brief but descriptive,** as the project title will be used for the lifetime of the project and in communications with local communities and long titles make email subjects long and difficult to understand, the project title can be modified on the application form if necessary.

Please include a non-technical summary description of the proposed project in English and in the applicable languages of all potentially affected communities: Inuktitut (Kivalliq, North/South Baffin, Eastern Kitikmeot), Inuinnaqtun (Cambridge Bay, Kugluktuk, Bay Chimo and Bathurst Inlet) and French (City of Iqaluit).

The summary should use plain language only and address the following points in < 5,000 characters:

- **Who:** Company, individual or entity proposing the project.
- **What:** The type of undertaking being proposed and how it would be carried out. It may be helpful to describe the scale of the project, number of people involved, permanence of any facilities constructed, and methods of transport.
- **Why:** The objective of and need for the project, potential long-term implications.
- **Where:** general location of proposed activities in relation to closest communities, protected areas.

[illegible]
