RE: Cambridge Bay Solar-Storage Planning and Development Project

To Whom it May Concern:

In accordance with the Letter of Support dated October 22, 2022, provided to the Kitikmeot Corporation (KC), the Hamlet of Cambridge Bay fully endorses KC's proposed Cambridge Bay Solar and Storage Project. The Hamlet has actively collaborated with the project team to identify suitable sites and has approved the current proposed location. The land parcel is presently undergoing reclassification from Commissioner Land to Municipal Land.

On August 6, 2024, Aurora Energy Solutions presented to the Hamlet of Cambridge Bay's Land Planning Committee and requested site access to perform a geophysical analysis followed by a geotechnical investigation. This assessment aims to evaluate permafrost conditions at the site in an effort to design future-proofed foundations for the solar infrastructure by integrating considerations of future climate conditions.

Pursuant to the motion passed on August 6, 2024, the Hamlet of Cambridge Bay formally authorizes Kitikmeot Corporation (KC) and its contractor, Aurora Energy Solutions, to access the site to undertake the aforementioned activities.

Best Regards,

Jim MacEachern
