January 29, 2026

To Whom It May Concern,

On behalf of the Mayor and Council of the Hamlet of Arviat, we are pleased to provide this letter in support of 6106 Resources Limited, for the Hook Lake Exploration Project, through motion #18/26.

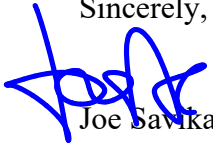

Mayor and Council understand the value of responsible mineral exploration and the role it can play in supporting economic development and job opportunities for Nunavut. Projects like the 6106 Hook Lake initiative have the potential to bring benefits to the region, including local employment, skills development, and opportunities for local businesses.

Mayor and Council also believe that strong communication with the community and care for the land are important throughout the exploration process. We encourage the project proponents to continue working closely with the Hamlet of Arviat, Inuit organizations, and residents, and to consider community feedback and traditional knowledge as the project moves forward.

Based on the information shared with us, Mayor and Council are supportive of the 6106 Hook Lake Exploration Project and wish them success as the project progresses.

If further information is needed, please feel free to contact the Hamlet office.

Sincerely,

  
Joe Savikataaq Jr  
Mayor  
Hamlet of Arviat
