

Demande de la CNER faisant l'objet d'un examen préalable #126292

Long Term Water Project (LTWP)

Type de demande : New

Type de projet: Municipal and Industrial Development

Date de la demande : Wednesday, December 31, 2025

Period of operation: from 2029-11-01 to 2099-11-01

Promoteur du projet: Kevin Kerr
City of Iqaluit
100 1085 Mivvik Street
Iqaluit Nunavut X0A0H0
Canada
Téléphone :: 9026987872, Télécopieur ::

DÉTAILS

Description non technique de la proposition de projet

Anglais: See water licence application executive summary in documents

Français: See water licence application executive summary in documents

Inuktitut: See water licence application executive summary in documents

Personnel

Personnel on site: 65

Days on site: 1200

Total Person days: 78000

Operations Phase: from 2026-06-01 to 2029-10-31

Operations Phase: from 2029-11-01 to 2099-11-01

Post-Closure Phase: from to

Activités

Emplacement	Type d'activité	Statut des terres	Historique du site	Site à valeur archéologique ou paléontologique	Proximité des collectivités les plus proches et de toute zone protégée
Long Term Water Project (LWTP)	Access Road	Municipal	Undeveloped land	Archaeological surveys have been completed, and sites that overlap the project development area have been mitigated.	The project is located entirely within municipal boundaries
Long Term Water Project (LWTP)	Quarry/Borrow pit	Municipal	Undeveloped land	Archaeological surveys have been completed, and sites that overlap the project development area have been mitigated.	The project is located entirely within municipal boundaries
Long Term Water Project (LWTP)	Municipal and Industrial Development	Municipal	Undeveloped land	Archaeological surveys have been completed, and sites that overlap the project development area have been mitigated.	The project is located entirely within municipal boundaries

Engagement de la collectivité et avantages pour la région

Collectivité	Nom	Organisme	Date de la prise de contact
Iqaluit	Open house	community -wide	2023-06-07
Iqaluit	Open house	community-wide	2023-06-09

Autorisations

Indiquez les zones dans lesquelles le projet est situé:

South Baffin

Autorisations

Organisme de régulation	Description des autorisations	État actuel	Date de l'émission/de la demande	Date d'échéance
Office des eaux du Nunavut	Renewal and amendment to Type A Water Licence 3AM-IQA1626	Applied, Decision Pending	2016-06-16	2026-06-16

Project transportation types

Transportation Type	Utilisation proposée	Length of Use
Land	Pick-ups, heavy equipment	

Project accomodation types

Collectivité

Utilisation de matériel

Équipement à utiliser (y compris les perceuses, les pompes, les aéronefs, les véhicules, etc.)

Type d'équipement	Quantité	Taille – Dimensions	Utilisation proposée
Light utility vehicles and personal cars	5 to 6	N/A	Transport
Excavator 30 tons with breakers	1	34.7 ft x 10.5 ft x 11.7 ft	Excavation
Excavator 45 tons with breakers	2	38.4 ft x 11.2 ft x 12.28 ft	Excavation
Excavator 67 tons with breakers	1	40 ft x 12 ft x 13.4 ft	Excavation
Front end loaders	1	13.7 ft x 8.25 ft x 10.7 ft	Excavation
Rock trucks	2 to 3	18.1 ft x 12.15 ft x 11.27 ft	Earth moving and grading
Bulldozers D8	1	27.5 ft x 14.3 ft x 11.8 ft	Earth moving and grading
Graders	1	32 ft x 8 ft x 10.5 ft	Earth moving and grading
Compactors	2 to 3	17.38 ft x 7.58 ft x 10.14 ft	Compacting
Tri-axle haulage trucks	0	N/A	Transport of large equipment
Tractor-trailers with floats for transporting equipment.	2 to 3	N/A	Transport of large equipment
Boom cranes (40-ton crane)	2	N/A	Transport of materials
Boats	2	N/A	Transport of materials
Air track drilling equipment	2 to 3	N/A	Required to advance blasting boreholes
Rock crusher	1	N/A	Crushing of excavated and blasted materials
Electrical generators	4 to 5	N/A	Generate electricity on areas where no electrical distribution is available
Concrete plant	1	N/A	Production of concrete for pump stations
Compressors	2 - 3	N/A	Air compressors for pneumatic tools use

Décrivez l'utilisation du carburant et des marchandises dangereuses

Décrivez l'utilisation de carburant :	Type de carburant	Nombre de conteneurs	Capacité du conteneur	Quantité totale	Unités	Utilisation proposée
Diesel	fuel	2	50000	100000	Liters	Heavy Equipment
Gasoline	fuel	2	5000	10000	Liters	Pickup Trucks / Pumps / Generators
Propane	fuel	20	100	2000	Lbs	Welding / Equipment Repairs / Energy

Other	fuel	20	100	2000	Lbs	Oxy-AcetyleneProposed for: Welding / Equipment Repairs / Energy
Explosives	hazardous	78	20000	1560000	Kg	New Reservoir / Pump Station / Outlet
Oil	hazardous	22	207	4554	Liters	Heavy Equipment
Diesel Exhaust Fluid (DEF)	hazardous	6	1000	6000	Liters	Heavy Equipment
Grease	hazardous	200	1	200	Lbs	Heavy Equipment

Consommation d'eau

Quantité quotidienne (m3)	Méthodes de récupération de l'eau proposées	Emplacement de récupération de l'eau proposé
83	Permanent water intake structures	Lake Qikiqtaalik and Niaqunguk (Apex) River

Déchets

Gestion des déchets

Activités du projet	Type des déchets	Quantité prévue	Méthode d'élimination	Procédures de traitement supplémentaires
Information is not available				

Répercussions environnementales :

New infrastructure and water withdrawals introduce potential impacts. Key impacts and mitigation measures include:

- Groundwater and surface water: Withdrawals from Lake Qikiqtalik and the Apex River may lower water levels; pumps will be operated within DFO guidelines.
- Fish and aquatic habitat: Pump intakes will be screened; pumping will occur only when river flows exceed thresholds.
- Vegetation and wildlife: Clearing tundra vegetation will be minimized; pipeline alignment avoids sensitive habitats.
- Permafrost and soils: Construction will follow geotechnical recommendations to prevent or minimize thawing; reservoir liners will be used.
- Sediment control measures and spill response will be implemented for construction activities.
- Archaeological impact assessment Archaeological sites identified within the project area boundaries have been mitigated and are no longer considered significant and hold limited to no interpretive value.
- Environmental Protection Plan: mitigation plans (sediment control, spill response) are provided

Additional Information

SECTION A1: Project Info
