Good morning,

Can you save this as pdf and upload to EMS?

Francis

Hi Francis,

Thank you for your email.

The structures will be properly winterized, secured, and stored on-site at the end of each operating season. While they can be easily removed from the site if required, we believe it would be more efficient and safer to leave them in place, properly secured, during the off-season.

All other materials, including fuel, oil, waste, and any other consumables or potentially hazardous substances, will be removed from the site at the end of each season. Only the accommodation structures and associated storage and equipment will remain on-site.

Please let me know if you require any further clarification or additional information.

Thank you,

Martin Greguš Jr.

Good morning Martin,

We are looking for some clarification on whether the structures will be stored on-site, year-round at the end of operation season? or will they be removed from site?

Looking forward to hear from you.
