Hi Jordan,

Thank you again for taking the time to speak with me yesterday regarding the Baker Lake Project currently at the screening stage.

I am writing to provide supplementary information on community engagement activities completed in Baker Lake from March 10 to March 13, 2026, in advance of the proposed 2026 exploration program. I understand that the file is now at screening and that additional materials cannot be uploaded to the system, however I wanted to ensure this recent engagement is on record as part of the review process.

During this visit, Bayridge Resources met with members of the Community Lands and Resources Committee (CLARC) at the Kivalliq Inuit Association office, including representatives from the KIA, the Baker Lake CLARC, the Hunters and Trappers Organization, and an Elder representative. The purpose of this meeting was to present the proposed program and receive input on land use, areas of importance, and potential concerns.

Community knowledge shared during this session included caribou migratory routes, historical land use, and areas of cultural importance. Based on feedback received, Bayridge has committed to excluding the eastern portion of the claim block from the proposed 2026 exploration program.

Following this meeting, Bayridge hosted a public information session at the Baker Lake Community Hall on the evening of March 11. While approximately 65 attendees signed the register, additional attendance was indicated through approximately 87 distributed raffle tickets and general turnout observed during the session. An Inuktitut interpreter was present to support communication.

The session provided an opportunity for community members to learn about the project, ask questions, and provide input. Project maps were made available and community members were invited to identify areas of importance directly on the maps. Feedback from both formal and informal discussions is being incorporated into planning for the proposed program.

During the information session, community members raised questions regarding local employment opportunities and potential effects related to uranium. Bayridge confirmed its commitment to providing local employment opportunities where possible, including the use of local wildlife monitors, subject to availability. Questions related to uranium and radiation were addressed by explaining the early-stage nature of the program, which is limited to exploration activities such as mapping, sampling, and drilling to better understand the geology, and does not involve mining or processing. These discussions were an important part of the engagement and will continue to be addressed through ongoing communication with the community.

In addition to formal meetings, Bayridge representatives held informal discussions with community members throughout the visit to further understand local perspectives.

A small selection of photographs from the session and engagement activities is attached for reference, including examples of map-based input received from the community.

Bayridge is committed to ongoing engagement with the Baker Lake community and will continue to work with local organizations and stakeholders as the project advances.

Please let me know if any additional information would be helpful.

Kind regards,

Kasey Stone
Community Engagement Lead

BAYRIDGE RESOURCES ADVANCES COMMUNITY ENGAGEMENT AHEAD OF 2026 PROGRAM AT THE BAKER LAKE URANIUM PROJECT, NUNAVUT

Vancouver, British Columbia (**March 18, 2026**) - **Bayridge Resources Corp. (CSE: BYRG) (OTCQB: BYRRF) (FSE: OOK0)** ("**Bayridge**" or the "**Company**") is pleased to provide an update on recent corporate activities completed in Baker Lake, Nunavut, in advance of its proposed 2026 early-stage exploration program (the "Program") at its Baker Lake Uranium Project (the "Project"), located approximately 65 kilometres southeast of the community in the Kivalliq Region.

The first major community engagement program was conducted from March 10 to March 13, 2026, by **Vice President of Exploration, Mark Richardson**, and **Community Engagement Lead, Kasey Stone**. The purpose of the visit was to engage with local stakeholders, share information regarding the proposed Program, and gather community input prior to the commencement of field activities.

"We are committed to meaningful and early engagement with the Baker Lake community as we advance the Project," said Mark Richardson, Vice President of Exploration. "The feedback we received during our recent visit was invaluable and has already informed our planning, including the decision to exclude areas identified as important to the community. We appreciate the openness of the discussions and look forward to continuing an open discussion with all key stakeholders".

Community Information Session

On the evening of March 11, 2026, the Company hosted a public information session at the Baker Lake Community Hall, which was attended by more than 100 community members.

The session provided an opportunity for community members to learn about the proposed Program, ask questions, and provide feedback. An Inuktitut interpreter was present to ensure accessibility of information. Community members were also invited to review Project maps and provide input on land use and areas of concern.

Ongoing Engagement

In addition to formal meetings, the Company engaged with community members through informal discussions during the visit to further understand local perspectives. Feedback received will be considered in the planning and execution of the proposed 2026 Program.

"It was important for us to be in the community early, before any work takes place, to listen and learn directly from local knowledge holders," said Kasey Stone, Community Engagement Lead. "The conversations we had both in formal meetings and with community members will play an important role in shaping how we move forward. We are committed to maintaining open and transparent communication throughout all stages of the Project."

Regulatory Update

The Project has now entered the screening phase with the Nunavut Impact Review Board (“NIRB”). Community engagement is a key component of the regulatory process, and the Company will continue to engage with local organizations and stakeholders as the review progresses.

Mark Richardson, P.Geo., Vice President of Exploration, is the Qualified Person as defined by National Instrument 43-101 and has reviewed and approved the technical content of this release.

About Bayridge Resources Corp.

Bayridge Resources Corp. is a green energy company advancing its portfolio of Canadian uranium projects. The 51% owned Baker Lake Uranium Project consists of 83 contiguous claims in the Kivalliq Region of Nunavut, covering 619 km². Exploration has defined a 75 km unconformity with multiple uranium targets, supported by modern drilling and airborne geophysical surveys. Bayridge has also earned a 40% Interest in the 1,337 ha Waterbury East project, that is located 25 km northeast of the Cigar Lake Mine in the northeastern Athabasca Basin region. Geophysical surveys have identified a 7km long conductivity corridor where mid-2000's drilling highlighted faulted and altered basement rock with local uranium enrichment. Large sections of this corridor remain untested.

Forward-looking information

This release contains statements and information that, to the extent that they are not historical fact, may constitute "forward-looking information" within the meaning of applicable securities legislation based on current expectations, estimates, forecasts, projections, beliefs and assumptions made by management of the Company. Forward-looking information is generally identified by words such as "believe", "project", "aim", "expect", "anticipate", "estimate", "intend", "strategy", "future", "opportunity", "plan", "may", "should", "will", "would", and similar expressions. Although the Company believes that the expectations and assumptions on which such forward-looking information are reasonable, undue reliance should not be placed on the forward-looking information because the Company can give no assurance that it will prove to be correct. Since forward-looking information addresses future events and conditions, by its very nature it involves inherent risks and uncertainties. Many factors could cause actual future events to differ materially from the forward-looking information in this news release. The forward-looking information included in this news release is expressly qualified by this cautionary statement. The forward-looking information contained in this news release is made as of the date hereof and the Company undertakes no

obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, unless so required by applicable laws.
