To whom it may concern

Re: Caroline Bouchard – Université Laval

Please be advised that Caroline Bouchard will be undertaking cod population (size, structure, diet, genetics, etc) research in May 2026.

Caroline will be partnering with the Iqaluit Cod Derby to learn more of the Frobisher Bay population. She will only take cod that are harvested by community members taken by the competition.

Amaruq HTA is in support of this project and would like to be informed of data collected during this time.

If you require any further information, please contact our office.

Sincerely,

Sally Mikijuk

Manager
