NPC 151149: Iqaluit Cod Derby Science Project

[Close](#)

Proposal Status: Conformity Determination Issued

[Overview Documents](#)

[Project Overview](#)

Type of application: New

Proponent name:

Caroline Bouchard

Proponent company:

Universit  Laval

Project Description:

Uugaq (Arctic cod, *Boreogadus saida*) is a key species in Arctic marine ecosystems, a crucial food source for belugas, narwhals, and many species of seals and seabirds. In this project, we want to learn more about Frobisher Bay uugaq population, for example regarding size structure, diet, and genetics. We will collaborate with the Iqaluit Cod Derby to collect uugaq samples in May 2026.
