Attn: Mayor and Council

Subject: Notification of Exploration Program – Esker Gold Project 2025

Dear Mayor and Council,

Guardian Exploration Inc. respectfully notifies the Hamlet of Arviat of its planned 2025 early-stage mineral exploration program in the Esker area, located approximately 170 km west-northwest of Arviat, Nunavut. This work is part of Guardian's Esker Gold Project and will involve non-mechanized geological mapping, surface rock sampling, and small-scale geophysical surveys.

Key project information:

- Project Area: ~16,282 hectares, near South Henik Lake
- Timeline: August 21 – September 25, 2025
- Activities: Surface sampling, mapping, UAV magnetometer survey, and ground-based IP geophysical work
- Access: Daily by helicopter from an offsite base camp; no infrastructure or fuel storage on site
- Land Tenure: Combination of Crown land and Inuit Owned Land (surface rights under AR-27 and AR-29)

Guardian is committed to minimizing environmental impact, following Inuit Qaujimajatuqangit (IQ), and prioritizing Inuit participation. We plan to offer opportunities for local residents as field assistants, wildlife monitors, and logistical support, along with safety and technical training.

We welcome any comments, questions, or suggestions the Hamlet may have. Please feel free to contact us directly. We appreciate your attention to this matter and look forward to respectful collaboration.
Sincerely,

A handwritten signature in black ink, appearing to read 'G. Kowal'.

Graydon Kowal

President, Guardian Exploration Inc.
