Subject: Notification of 2025 Esker Gold Project Exploration Activities

Dear Members of the Arviat HTO,

Guardian Exploration Inc. is writing to notify you of our planned 2025 early-stage mineral exploration program in the Esker area, approximately 170 km west-northwest of Arviat. The Esker Gold Project will be conducted under Guardian's exploration claims and Mineral Exploration Agreement rights, and will focus on geological mapping, surface sampling, and geophysical surveys.

Key details include:

- Location: East of South Henik Lake
- Dates: August 21 – September 25, 2025
- Access: Daily by helicopter from an existing offsite camp
- Activities: Non-mechanized work including rock sampling, mapping, and low-impact drone and ground geophysics
- Land Tenure: Combination of Crown land and Inuit Owned Land (AR-27 and AR-29 surface rights)

No fuel will be stored in the field. There will be no road building or camp setup on-site. All work will be low-impact and in line with environmental and cultural stewardship practices. Guardian is committed to Inuit hiring and training, and we welcome the opportunity to work with members of the Arviat community in roles such as field assistants, wildlife monitors, and logistics support.

We respectfully request any feedback, questions, or recommendations you may have regarding the proposed work.

Thank you for your attention, and we look forward to continued engagement.

Sincerely,

A handwritten signature in black ink, appearing to read 'G. Kowal'.

Graydon Kowal

President
