Sampling sites	Other, Disposable gloves, fishing line	1-5 L	Municipal waste stream	N/A

Avatiliriniqmut Ayurhautingit:

Impacts are expected to be minimal. All sampling will be completed using non-destructive fishing techniques, such as trap nets or electrofishing. Angling may also be completed, depending on the success of other techniques, and employ barbless hooks and minimal "playing" of fish. All fish captured will be identified to species, measured, weighed and live released.

Additional Information
