North Baffin Regional Land Use Plan Appendix H Code of Good Conduct for Land Users

1. The landscape of each camp and other land use sites will be restored to its original condition to the greatest extent possible. Water quality will be preserved and no substances that will impair water quality will be dumped in water bodies. When possible and feasible, old sites will be restored to the natural state.
2. All land users shall assist communities and government(s) in identifying and protecting archaeological sites and carving-stone sites, as required by law.
3. Generally, low-level flights by aircraft at less than 300 metres should not occur where they will disturb wildlife or people. If such flights are necessary, they should only take place after consultation with the appropriate communities. All land users are responsible for reporting to the land managers any illegal or questionable low-level flight.
4. All activities on the land will be conducted in such a fashion that the renewable resources of the area in question are conserved.
5. Whenever practicable, and consistent with sound procurement management, land users will follow the practice of local purchase of supplies and services.
6. Land users will establish working relationships with local communities and respect the traditional users of the land.
7. During the caribou calving, post-calving and migrating seasons, land use activities should be restricted to avoid disturbing caribou, in general, and activities will be governed more specifically by caribou protection measures such as those contained in Appendix I.
8. Artifacts must be left where they are found. All land users are responsible for reporting the location of, or any removal or disturbance of artifacts, to CLEY.
9. The mining industry is encouraged to assist in identifying local carving-stone deposits and report any discoveries to the QIA. Industry is also encouraged to identify and report old waste sites that need to be cleaned up.
10. All land users shall obey the laws of general application applying to land use.

Application for Crown Land:		Office Use Only: Application Number:	
<p>Note to the Applicant:</p> <p>This form is the first step in your application for Federal Crown Lands.</p> <p>Applications are reviewed by government agencies responsible for land use, and the regulation of activity in the NWT. This form is intended to help both you and government. It is not a legal document, but a means of providing the people who have to deal with your application information needed to decide on the application's merit. Most importantly, in filling out the form you will better understand some of the steps that have to be taken in planning and carrying out a successful enterprise.</p> <p>You are advised to read the entire application form before you begin to fill it out. The amount of space provided for each question suggests the level of detail expected. However, you may be asked to supply further additional information. This is an application only, and in no way implies the granting of an approval to the applicant.</p>			
A. Information on Applicant:			
Name in Full:	Mark Laurence Mallory		Legal Age:
Address:	Box 1714, Iqaluit, Nunavut, X0A 0H0

Are there any waste products produced by this use? YES: <input checked="" type="checkbox"/> NO: <input type="checkbox"/> If YES describe the type of waste, the volume of waste and the disposal method(s) to be used:			
Grey water (10 L/day) disposed of in sump hole; all garbage flown out			
Are there any hazardous materials to be stored other than consumer goods? (Fuel, etc.) YES: <input checked="" type="checkbox"/> NO: <input type="checkbox"/> If YES please list the type, estimated quantities and storage method(s).			
Annually about 1 can (205 L) of gasoline and 1 can of Kerosene are used at the site; drums taken back to Resolute Bay when emptied			
*(Hazardous materials as defined in the Transportation of Dangerous Goods Act and Regulations of the Workplace Hazardous Material Information System).			
C. PARCEL DESCRIPTIONS:			
General Description of Parcel (Hilly or Flat, Tree Cover, Soil Type) (if surveyed, state lot and block or group number. If unsurveyed, state size of parcel and general area).			
Flat parcel of low, alluvial gravel			
Project Description:			
Briefly describe your general purpose and goals. This is your chance to explain in your own words, your plans and objectives.			
Scientific research on arctic seabirds. We will be observing, measuring and banding various marine birds nesting on this unnamed island. We wish to put a small, sleeping cabin in for protection against polar bears.			
Project Location:			
Provide an NTS map on a 1:50,000 scale indicating:			
- Approximate boundaries of land area under application in metres/feet or milepost or road, is applicable - Nearby water bodies - Distance to nearest community		- Existing access if any - Proposed new access routes - Use of adjacent land - Co-ordinates	
Indicate approximate area of land under application in hectares:		Approx 1 ha centered around coordinates below	
Standard NTS Map Co-ordinates:		Latitude:	75° 48'
Map Sheet Number:	68H	Longitude:	96° 20'
D. CONSTRUCTION PLANS:			
Briefly describe any existing building and/or construction of facilities that you plan. Use your sketch for illustration.			
We wish to install a new, small (3 m x 4 m) sleeping cabin at the site. A temporary Weatherhaven or tent would be set up each year for cooking.			

Indian and Northern
Affairs CanadaAffaires indiennes
et du Nord Canada

Value of improvements already on the land:

Name of owner of improvements:

Describe briefly your planned construction methods and materials: Will be constructed from plywood, 2x4 and 2x6, with a 4x4 foundation. We will have 1 door and 2 windows. The building will be constructed by a 4 person crew who would go to the site in June 2006.

Outline your time schedule for your construction program. Indicate approximate starting, construction stage and completion times:

Fly materials in last week of June – construction to take 2 days

Describe existing and proposed methods of access, and transportation for your project:

Access by Twin Otter or Helicopter

E. WATER:

Do you plan to use water at your facility(s)? If so, estimate the volume to be used per day:

Yes, approximately 25 L/day

Does your plan involve the alteration of any water course? (ie: construction of dams or diverting natural water flows) If so, describe the proposed changes.

No

How do you plan to dispose of:

Liquid Waste: Grey water disposed in sump 100 m from shoreline

Solid Waste: Combustible garbage burned, non-combustible taken back to Resolute, sewage disposed of in sump 100 m from edge of cliff

If you have specific waste treatment equipment in mind, please describe it:

F. OPERATIONS:

Is your use: Year-round ☐ Or: Seasonal ☒

If seasonal, give details: Used to monitor wildlife seasonally, typically June - August

How many year round residents will be living at the site: None year-round; up to 4 seasonally

G. RESOURCE CAPABILITY:

Indian and Northern
Affairs Canada

Affaires Indiennes
et du Nord Canada

What other general resource activities are taking place on or near your proposed project area, e.g., does the area involve a trapline or any mining activity? Is it an access point for resident anglers, hunters, campers, etc. Is there a registered mineral claim on the project area?

None.

Do you see any activity listed in your answer to the above affecting your operation, or is your operation a conflict to them? If so, how? **No**

Do you plan on using your facilities for other than the applied for purposes? If yes, briefly describe alternate use.

No

H. FINANCIAL CONSIDERATIONS:

Provide a brief description of the capital costs for your project: **Building supplies from Resolute Bay**

Site Preparation: **None**

Materials for Initial construction: **\$5000**

Construction Costs: **Volunteers**

Provide a time framework within which these capital costs will be incurred, ie: estimate costs per phase on your construction schedule (section D)

Materials purchased in November 2005

Is there any additional information you wish to include:

The cabin will be used for research purposes in the summer. We will make it available for the local Hunters and Trappers to use at times when we are not conducting research

L. FEES:

Land Application Fee (\$150.00) (except Government Agencies):

\$

GST for all applications (\$10.50) (except "Residential"):

\$

TOTAL FEES SUBMITTED with this application:

\$

PLEASE MAKE CHEQUE/MONEY ORDER PAYABLE TO: "RECEIVER GENERAL FOR CANADA"

I hereby acknowledge and confirm that the filing of this application does not grant me any rights to take, occupy or use the land for which I have applied.

I certify that the information I have given in this application is correct, to the best of my knowledge.

Dear Mr. Mallory:

Re: Application for Crown Land #68H16001

Type of Operation: Government Research Camp

Location: Queens Channel, North Baffin Region, Nunavut, NTS 68H16

Thank you for your application for Crown Land, received in this office on May 20, 2008. Please note that this application is recorded in our records under file number 68H/16-1. All future correspondence under this application should refer to our file number.

Please be advised that submission of your application only indicates your interest in acquiring the said parcel and does not give you any rights of entitlement to use, possess or occupy the land in any manner.

Yours truly,

Jeff Holwell
