Dear Mr. Mason:

**Re: Land Use Permit #N2007X0011**  
**Type of Operation: Winter Road**  
**Location: Churchill to Arviat, Arviat to Ferguson Lake, Kivalliq, NU**

Upon reviewing the land use records of this office, it is noted that the captioned land use permit expired on April 18, 2010.

At this time we wish to point out that pursuant to Section 19 of the *Territorial Land Use Regulations*, restoration, clean-up and removal of equipment, materials, buildings, etc., should have been completed at the end of the land use operation and pursuant to Section 33 of the Regulations a final plan should have been submitted within sixty (60) days after the completion of the land use operation or the expiry date of the permit.

According to Section 33 of the *Territorial Land Use Regulations*, we require a final plan which shows:

1. The lands actually used for the land use operation, that is, a map or maps drawn to scale which clearly outline the area used by you, the Permittee, in such a manner that we can distinguish between areas used by you and those areas not used by you.

The procedure normally used is to present two maps of different scales, one being 1:250,000 and the other being on a scale which clearly depicts the operation as it was conducted on the surface, distinguishing the use area vs. the non-use area.

**ALL MAPS MUST HAVE THE NORTH INDICATOR, SCALE AND CO-ORDINATES CLEARLY MARKED.**

2. A submission indicating the hectares utilized in each segment of the land use operation, ie: campsites, drill sites, seismic lines, access routes, etc.

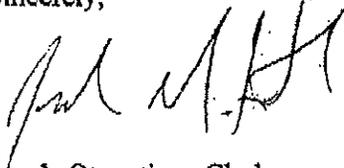

**Canada**

3. A submission outlining the calculation of fees for ease of reference.

It should also be appreciated if you would advise us of any wildlife observations made during the course of your operation.

Your immediate attention to this matter would be appreciated.

Sincerely,

Lands Operations Clerk  
Land Operations Clerk
