Dear Mr. Dewar:

RE: Notification of Short Diamond Drill Program at Ferguson Lake, Starfield Resources

This letter is to notify you that Starfield Resources will be operating a short drill program starting mid to late October and running for approximately 6 weeks, weather permitting. Starfield has enlisted the assistance of Thanda Resources, who have diamond expertise, to conduct this diamond exploration program.

The proposed program would entail drilling in to twelve (12) geophysical anomalies that were identified following the aerial geophysical survey that was conducted in March and April 2009. All of these geophysical anomalies are located on dry land, see the enclosed table and map.

The proposed program will utilise one drill that will operate 24 hours per day, 7 days per week. Major Drilling will be the drill contractor. The drill rig is heli-portable, therefore drill moves and all crew changes in the field will be done via helicopter.

Each drill site will be cleaned up before moving to the next drill site and before and after photos will be taken and provided in the annual report submitted by Starfield each year. An emergency shelter and emergency kit will be located at the drill site in case of inclement weather. A spill kit will also be kept at the drill site.

Wildlife sighting sheets will be filled out by personnel during the drill program and sightings will be provided in the annual report.

The camp will be closed for winter once the drill program is completed. A notice of closure will be sent to your office prior to drilling the final hole. If you have any questions, please do not hesitate to contact me at fmason@starfieldres.com or Allison Rippin Armstrong at ar_enviro@yahoo.ca.

Yours truly,

Fred Mason
VP Operations

Starfield Resources Inc.
