Hi John;

Thanks for bringing this to my attention. I am in B.C. right now, driving to Whistler to attend a friends wedding. I will be driving back and getting home on Monday night. I will give you a call on Tuesday morning to check to see if the package has arrived.

On site we have two drills:
17A BOYLES

37A BOYLES

I have attached two figures showing the areas of interest for drilling.

Thanks,
Allison

Good day Alison:

We were looking through the application package and noticed that there was no information on the drill itself (type, size....).

We are also in need of a map showing where the proposed drilling is going to take place (approximate if that is all that is know),

If you could forward this information to us that would be great, I will let you know when the original package from Rankin shows up (we have not received it yet).

Thanks

John G Craig

Subject: Drill weights

Hello;

I have spoken with the VP of Exploration, the VP of Operations and the Drill Foreman for Major Drilling and they have informed me that the weight of the drills is approximately 2 tons (each).

Allison
