Dear Mr. Addie:

Re: Land Use Permit #N2007X0043

Type of Operation: Winter Trail Amendment

Location: Kugluktuk to MacGregor Lake, Kitikmeot, NU, NTS 863/11, 860/11

From the land use records of this office, it is noted that the captioned land use permit will expire on February 14, 2010.

At this time we wish to point out that by the expiry date of your land use permit restoration, clean-up and removal of equipment, materials, buildings, etc., must be achieved.

Should you require additional time to complete your land use operation, please refer to Section 31(5) of the *Territorial Land Use Regulations* regarding extensions of duration of a permit. An extension request must be received before the expiry date of the permit.

If no extension of permit is requested, you are required to submit a final plan of your land use operation within sixty (60) days of completion of your land use operation, or the expiry of your permit.

According to Section 33 of the *Territorial Land Use Regulations*, we require a final plan which shows:

1. The lands actually used for the land use operation, that is, a map or maps drawn to scale which clearly outline the area used by you, the Permittee, in such a manner that we can distinguish between areas used by you and those areas not used by you.

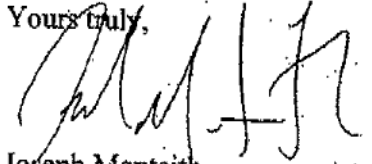

The procedure normally used is to present two maps of different scales, one being 1:250,000 and the other being on a scale which clearly depicts the operation as it was.

conducted on the surface, distinguishing the use area vs. the non-use area.
**ALL MAPS MUST HAVE THE NORTH INDICATOR, SCALE AND CO-
ORDINATES CLEARLY MARKED.**

2. A submission indicating the hectares utilized in each segment of the land use operation, ie: campsites, drill sites, seismic lines, access routes, etc.
3. A submission outlining the calculation of fees for ease of reference.

It should also be appreciated if you would advise us of any wildlife observations made during the course of your operation.

Yours truly,

Joseph Monteith
