# **CANADIAN WILDLIFE SERVICE PERMIT APPLICATION**

| NOTE TO RESEARCHERS  |   |  |  |  |  |  |
|--|---|--|--|--|--|--|
| Without exception, all research within the NWT and Nunavut must be licensed. This includes work in indigenous knowledge as well as in physical, social, and biological sciences. For information on licensing for your project within the NWT, please refer to the Aurora Research Institute's Web site at <a href="http://www.nwtresearch.com">http://www.nwtresearch.com</a> . For Nunavut, visit the Nunavut Research Institute Web site at <a href="http://www.nri.nu.ca">http://www.nri.nu.ca</a> . |   |  |  |  |  |  |
| For Scientific Permits: Prior to issuing a Scientific Permit to Take, Salvage or Disturb Migratory Birds, CWS requires a copy of either an NWT or Nunavut Wildlife Research Permit; or an Aurora Research Permit/Nunavut Research Permit. Include a copy of either permit with this application or forward a copy to CWS upon receipt of it, or your CWS permit will not be issued.  |   |  |  |  |  |  |
| <b>Nunavut:</b> In Nunavut your project will have to undergo One of their requirements is that you obtain a conformit Please ensure that you have done so.   |   |  |  |  |  |  |
| To be completed by all applicants:   |   |  |  |  |  |  |
| ☐ New application  | Type of permit applied for:   |  |  |  |  |  |
|  | ☐ Bird Sanctuary permit   |  |  |  |  |  |

## 2. SUMMARY PROJECT INFORMATION

## Project title:

Community – Based Monitoring of Sea Ice and Eider Duck Populations around the Belcher Islands, Nunavut

#### Project objective: (concise statement of purpose and goals)

Comprehensive coverage of the different oceanographic regimes will be important in understanding how changing sea ice conditions are influencing the large scale distribution and abundance of eider populations. We will integrate data from time lapse monitoring, satellite imagery of ice conditions, local knowledge, and foraging behavior into a computer model to assess the influence of different environmental regimes and harvest rates on eider populations. This will also help determine, 1) when and where eider ducks are most vulnerable to starvation 2) How water salinity and ice conditions influence eider movement and use of Polynyas. We are also interested in measuring the contaminant and parasite loads in eiders over-wintering in the Belcher Island Archipelago, and assessing how these levels influence eider health.

| Project description: (non-tech and occasion of all activities;  |   | or less; describe purpose, nature isity of vehicle use)   |  |  |  |  |
|---|---|---|--|--|--|--|
| We will be using time lapse photography, high resolution satellite imagery and oceanographic monitoring (salinity meters and tide current meters) at several sites to quantify wildlife abundance and behaviour in relation to the ice data.  |   |   |  |  |  |  |
| Oceanographic monitoring will take place from January – March, and automatic time lapse photography stations will be set up from January – June to capture ice break-up. These project elements are part of a long-term community-based monitoring project, and will be executed by local hunters in consultation with a biologist. |   |   |  |  |  |  |

| ☐ Use of aircraft   | Cruise ship   | ☐ Seismic exploration   |  |  |  |  |
| ☐ Use of off-road vehicles ☐ Drilling activities ☐ Mining activities  |   |   |  |  |  |  |
| ☐ Other (please specify): use of snowmobile   |   |   |  |  |  |  |
| Are you applying to kill, salvage or otherwise interfere with migratory birds (e.g. take blood, transmitter implant, etc.)?   |   |   |  |  |  |  |
| ⊠ Yes □ No  |   |   |  |  |  |  |
| If yes, provide details, including specie(s) of bird, number and method. Indicate whether the approval of an animal care committee has been received and include the name of the committee.   |   |   |  |  |  |  |

| We will employ experienced hunters to collect up to 60 Common Eiders using 12 ga shotguns and bird shot. We will collect both males and females.  |
|---|
| **We will catch 35 common eiders with a salmon gillnet suspended in the air. This method captures the eiders without harming them and we have used it in the Belcher Islands previously. We will attach a small GPS tag to the feathers on the back of the captured common eiders. The tags weigh 18g (<1% of the body mass of a Common Eider), and will be attached to female eiders by taping the unit to their dorsal feathers, approximately 5 cm above the uropygeal gland, using waterproof, cloth-backed Tesa tape. Data will be received via remote downloadable GPS receiver stations and the units will fall off the eiders within 2-3 weeks of attachment. |
| We have submitted an Animal Care Committee approval, but have not yet received approval.  |
|   |
|   |
|   |
|   |
| Do you plan to carry firearms?  |
| ⊠ Yes □ No  |
| If yes, please describe number, type and purpose of firearms.   |
| Bear protection - Remington Marine Magnum 12 gauge shotguns, 1 per person   |

### 3. PROJECT LOCATION

Geographic place names and coordinates: (be as specific as possible; enter multiple coordinates for activities occurring over large area(s))

| Location   | Geographic Coordinates      |
|--|-----------------------------|
| Environment Canada Cabin                                     | 55° 49.361N, 79° 53.925W    |
| Coastline near Inukjuuaq (Oceanographic monitoring only)     | 58° 28' 11"N, 78° 03' 01" W |
| Coastline near Chisasibi (Oceanographic monitoring only)     | 53° 49' 08"N, 78° 55′ 49" W |
| Coastline near Kuujjuaraapik (Oceanographic monitoring only) | 55° 16' 56"N, 77° 45' 39" W |
| Coastline near Umiujaq (Oceanographic monitoring only)       | 56° 30' 54"N, 76° 31' 01" W |

**NOTE:** A map document delineating activity centres and travel corridors, etc. is required and should accompany this application. Please submit shapefiles if available.

Status of land upon which project will occur:

|   | Federal crown                     |
|---|-----------------------------------|
| X | Inuit-owned or other private      |
|   | Territorial (commissioner's land) |

## 4. OPERATIONAL AND ENVIRONMENTAL CONSIDERATIONS

Provide a summary of potential environmental impacts and proposed restoration plans and activities: (describe the effects of the proposed activities on land, water, flora, fauna; attach separate pages as necessary)

We will be conducting our research during the winter for a relatively short period of time (3 months). We will be using snowmobiles to travel to and from the camp and polynyas, white gas for cooking, and kerosene to heat the cabin. All of these fuels will be stored in appropriate containers to avoid leaks. MSDS and spill contingency plans will be provided to the field crew. Because the work will take place during the winter, fuel spills will be cleaned up before they permeate the snow and ice and impact the land or water.

Past QIA exemption #: Q09XN06

Nunavut Water Board licence: 3BC-GBI1114

NIRB File No.: 10YN058

List of equipment and fuel to be used: (include aircraft, vehicles, boats, generators, large tent structures, various types of fuel, etc; indicate proposed containment strategies for all fuels; attach separate pages as necessary)

| Equipment / Fuel     | Size / Amount | Proposed use / Containment                |
|----------------------|---------------|---|
| Snowmobiles/gasoline | 4             | travel to/from hunting grounds/jerry cans |
| Cook stove/white gas |               | cooking/metal canister                    |
| Heater/kerosene      |               | heat cabin/metal canister                 |
|                      |               |   |
|                      |               |   |

NOTE: Please submit a copy of a spill contingency plan, if available, with this application.

Waste disposal: (describe any wastes that may be produced, e.g. garbage, grey water, sewage, hazardous waste, and proposed disposal methods; attach separate pages as necessary)

| Type of waste | Approx. amount produced | Proposed disposal method           |
|---------------|-------------------------|------------------------------------|
| Garbage       | 20lbs                   | Return to Sanikiluaq by snowmobile |
| Greywater     | 10L/day                 | sump >150 m from any water         |
| Sewage        | 2L/day                  | sump >150 m from any water         |
|               |                         |                                    |
|               |                         |                                    |

# 5. POTENTIAL ADVERSE EFFECTS TO SPECIES AT RISK

#### PLEASE NOTE:

- You should consider species at risk legally listed on the Species at Risk Act (i.e. on Schedule 1) and those under consideration for legal listing, such as those designated by the Committee on the Status of Endangered Wildlife in Canada (COSEWIC).
- Refer to species status reports and other information on the Species at Risk Registry at <u>www.sararegistry.gc.ca</u> for information on specific species.

| Identify Species at Risk found within yo | our proposed | project area |
|--|--------------|--------------|
|--|--------------|--------------|

| Beluga whales, listed as endangered in the Eastern Hudson Bay by COSEWIC, but not listed under SARA, occur in the area during the winter.  |
|--|
|  |
| List any potential adverse effects that your project may have on the species, its habitat and/or its residence. All direct, indirect and cumulative effects should be considered.  |
| We do not anticipate any effects on Beluga Whales or their habitat, as our research will be carried out over a short period of time and have a very small impact on the land. There is the most chance of a small fuel spill near our cabin, which is located far from the marine habitat used by Belugas. |
|  |
| If potential adverse effects are identified, list mitigation to avoid or lessen those effects.   |
| When possible, refueling of snowmobiles will be done away from sea ice and open water to avoid a fuel spill.   |
|  |
|  |
| List monitoring measures to determine the effectiveness of mitigation and/or identify where further mitigation is required.  |
|  |
|  |
|  |
|  |

### 6. CONSULTATION

List local community representatives who have been contacted about your proposed activities: (include community groups, local businesses, schools, etc.; state how they are participating in your activity, if at all (e.g. providing advice, supplying goods, hired to assist you, etc.))
