TITLE: NEIGE (Northern Ellesmere Island in the Global Environment)

### OBJECTIVES OF RESEARCH:

There is no significant change in this project from our work in previous years.

We will determine the diversity of microbial life in ice shelf and other shallow pond communities using state of the art molecular techniques. We will characterize the physical characteristics and processes within northern Ellesmere Island's meromictic lakes. We will inventory the diversity of bacteria, eubacteria, Archaea, and viruses in the lakes of Quttinirpaaq National Park using DNA analysis.

### TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and the Department of Culture, Language, Elders and Youth archeological sites terms and conditions. These terms and conditions will form part of this licence.
