TITLE: Dynamics and Change of the Devon Ice Cap

### OBJECTIVES OF RESEARCH:

The project goal is to describe and explain ongoing changes in the area, mass and flow of the Devon Island ice cap so that we can estimate its recent current and future contribution to changes in global sea level. We are interested in how climate warming may cause faster flow of glaciers that end in the ocean, and how faster flow may lead to more mass loss by iceberg calving. Our work combines field studies with satellite and airborne remote sensing, and with modeling of ice cap flow and interactions with the atmosphere.

### TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions (attached) from the Nunavut Impact Review Board Screening Decision Report and by the Department of Culture & Heritage Archaeological sites terms and conditions. These terms and conditions will form part of this licence

### DATA COLLECTION IN NU:

DATES: April 20, 2015-June 10, 2015  
LOCATION: Devon Island

Scientific Research License 02 053 14R-M expires on December 31, 2015  
Issued at Iqaluit, NU on November 17, 2014
