To whom it may concern,

This letter is on behalf of the Mayor, Council and the community of Kugluktuk regarding their support of the Tundra Copper Corporation with reference to the Coppermine Project, NU.

Tundra Copper Corporation's ongoing efforts to keep ongoing consulting meetings with the community proves their concern and appreciation for what the community needs are and their respect for traditional values. On their last visit to the community they had meetings with not only council but also with Hunters and Trappers Organization (HTO), they established a program and are working closely with HTO to implement a wildlife mitigation program. This goes a long way in building a positive relationship with all members of the community going forward.

We understand that this is the early stages of the program and there will only be limited jobs available, but it is a start and could become a great benefit to the community should Tundra Copper Corporation be successful in their prospecting efforts. We strongly support Tundra Copper Corporation's effort and look forward to a successful working relation.

Sincerely,

Mayor Ryan Nivingalok
