Re: Extension Request for NIRB Screening of Parks Canada's "Underwater Archaeology and Biology Study of the Wreck of HMS Erebus" Project Proposal

Dear Ryan Barry

Parks Canada has received your request for an extension for NIRB Screening 15YN037. We acknowledge that your request for an extension is reasonable considering the delay in providing you with the additional information that you requested. Recognizing that a delay may be required, we do request that the screening be completed as quickly as possible within this context. There are many partners, including external agencies, involved with this project which makes an extended delay in the project start date a challenge.

In closing, I would like to take this opportunity to thank the NIRB staff for their assistance in moving this file along.

If you have any questions, please contact Jane Chisholm at 867-975-4762.

Sincerely,

Jenna Boon  
Nunavut Field Unit Superintendent
